"AOC proposes funding to deprogram white supremacists"

The problem is: ANY expression of #WhiteIdentity, on which America was originally founded, is equated with #WhiteSupremacy.

There is a coup in progress, initiated long ago, by #BigBrother & #TheMatrix of state capital.

From the NewYork Post (15/01/2021):

"The White supremacist cause is futile, it's nihilist," said AOC during a virtual town hall meeting Friday night. "Their world will never exist.

" . . there are programs to 'de-radicalize' brain-washed adherents [of White supremacy]. We need to double, triple or quadruple the funding for these programs," Ocasio-Cortez said.

America's founding fathers knew it would be difficult enough forging a nation from different European peoples (English, French, German, Dutch, etc.) of the SAME race, & impossible to include other races, which is why the 1790 Nationalisation Act restricted citizenship to Whites.

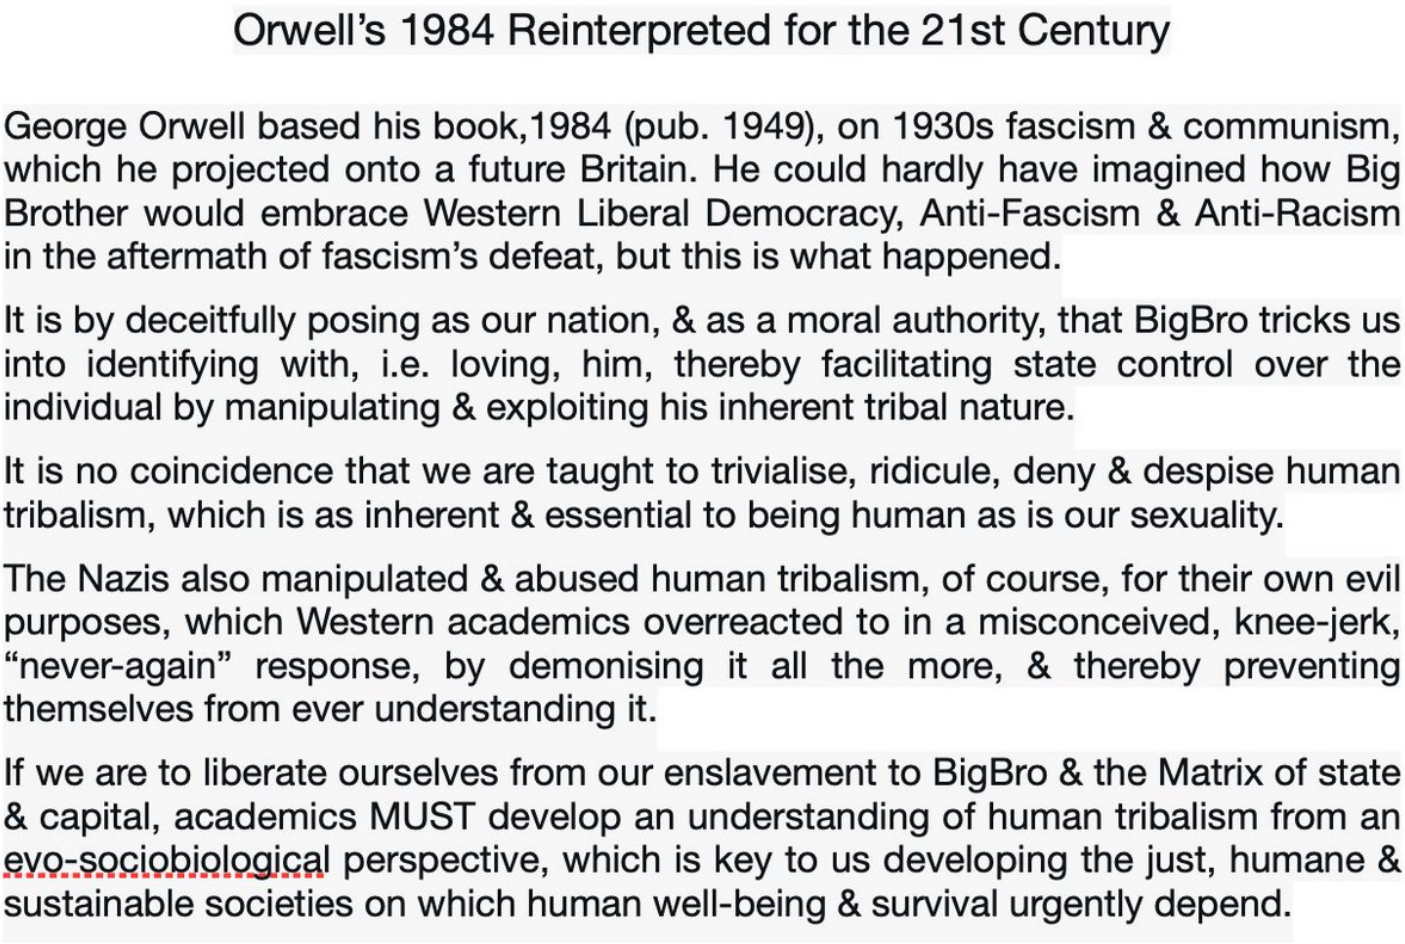

By modern standards, the founders were indeed White supremacists, but also had enough sense to know that multi-racial nationhood could never work. And so it has proven.

America never became a genuine nation, but just a bigger, more powerful, mercenary #PatronState than Britain.

This is profoundly important to understand.

America's #FoundingMistake was to equate state & nation.

It is by deceitfully posing as our nation that the state tricks us into loving #BigBrother.

The famous line from Lincoln's #GettysburgAddress, "Government of the people, by the people, for the people" was Orwellian newspeak (long before Orwell was born) for "Government of the elites, by the elites, for the elites.

Lincoln, remember, was a lawyer & one of the elite.

America needs a new constitution, written, not by Whites for Whites, as the original was, & repeatedly amended by #BigBro, but by & for ALL American citizens.

The present strategy of divide & rule, which serves the elites, needs to be replaced by one of divide & self-rule.

The Age-Old Strategy of Divide & Rule

DIVERSITY is now part of the West's age-old strategy of *divide and rule* (largely subconscious or obsured by Orwellian doublethink), whereby society is divided into a morally superior, now supposedly non-tribal, unprejudiced, "colour-blind" and xenophilic elite, on the one hand, and the morally inferior, naturally (evolved human nature being what it is) tribal, prejudiced, not colour-blind, but nativist and xenophobically-inclined masses, on the other, who must submit to the authority of and domination by their "*moral superiors"* (a moral animal like ourselves can be manipulated and control by a regime of moral rewards & intimidation as well as by one of material/physical rewards & intimidation).

It is, in effect, a modern, secular replacement for the power-political role of medieval church ideology. Original sin (disobedience of divine, i.e. priestly/state authority) has been replaced by "*racial prejudice*" (the natural human inclination - like original sin - to identity with members of one's own tribe, race or ethnic group, which was made responsible (wrongly) for the Holocaust and equated with the evils of Nazi racism), and which only submission to priestly/academic/state ideology and authority can save us from eternal damnation for, not as heathens and heretics, as in the past, but as bigots, xenophobes, nativists or racists.

State and society conflate and confound very different aspects of the original tribal environment in which human nature evolved, long before the first states and civilisations emerged from it, with the modern "*nation state*" now deceitfully posing as our tribe or nation (intra- and inter-tribal environment) itself, while at the same time facilitating society's SELF-exploitation (as an extra-tribal environment, on a par with the natural environment) to the personal advantage of its ruling elites and favoured (especially wealthy and academic/formerly priestly) clients, at the expense of society at large.

As in Britain, American democracy is dictated by its elites, which is better than no democracy at all, as in countries like China, but is not nearly good enough.

What Britain & America need now is #GrassrootsDemocracy. https://t.co/HDU5dSbpGm

> Grassroots-Democratic Multi-National Socialism (#GrDMNS)
>
> This is the name of my political philosophy & of the political party/movement I hope soon to initiate: #Contrapot

Britain has always been dominated by power-wielding elites.

As in all civilised countries, the power of the military is now subordinated to those wielding political power, which has two components:

1) Money, which is power in its most versatile form.

2) Moral authority.

These are the 2 forms of power dominate the West & have corrupted evolved human nature, so that instead of serving society at large & its long-term survival, it serves the personal self-interests of its elites, at the expense of society at large & its long-term survival.

The corrupting influence of money is manifest, but rationalised to the extent that we admire the rich simply for being rich, & the richest individuals most of all.

The corrupting influence of moral authority is largely overlooked & all the more pernicious for it.

The state wields moral authority by deceitfully posing as our nation, which is how it tricks us into loving #BigBrother. No need for torture, as in Orwell's depiction of him in 1984.

The Orwellian state also claims a spurious moral authority for itself from having embraced an ideology which goes to the opposite, but equally insane, extremes of Nazi racial ideology, that goes under the names of Post-Racial #Multiculturalism, DIVERSITY, Inclusion & #AntiRacism.

Provided we respect the rule of law & non-violence, individuals as individuals, & every individuals's racial & ethnic identity, we need have no fears of division.

We must reject BigBrother's attempts to unite us in a #NationState, which is not what Britain or America are.

Britain & America are Orwellian constructs, based on lies, deceit & regimes of rewards & intimidation. They are mercenary #PatronStates deceitfully posing as nations, in order to legitimise themselves, their ruling elites & the immense power they wield & abuse.

Why is this not recognised by the academics we look to as authorities on understanding society & the state?

Academics are privileged clients & employees of the state (i.e. #BigBro). That's why.
