Hello everyone! How many invocations of Light of the solar logos can each one summon during the next 6 days?  
How many of these summoned energies do we dare to take and integrate them into our lives, and anchor them in Gaia?

I could easily be the new #aquariuschallenge <https://t.co/8aiGQrDnHv>

The proposal, which is an invitation similar to the Olympic challenges, is to summon and integrate the energies of Truth and real Light in our lives. So we accelerate and welcome everything beautiful and bright that is coming.

Connecting and communing with our higher selves, and older brothers. Ask and request a constant flow of Light that reaches us, we receive them, and we integrate them into our systems and chakras.

And as if we were lightning rods, connect with Gaia and anchor the energies that we bring in ourselves and in Gaia. So that we are carried, and radiate this Light.

Why challenge? because it is an invitation that is extended to all, and that they ask me to remind you.

The task is ours as personnel on earth, to channel and take these energies to radiate and anchor them in Gaia and our life.

It could easily be the new #aquariuschallenge where we would work together, accompanying each other, and as a single team!
