intraday Trading strategy based on volume .

**See one by one of 15 minute chart you will get idea .
only alkem trapped today rest all done well .**

Like share Retweet for more like this.

Use 15 minutes candle and make entry after 9:50

In both cases Volume higher than previous bar

Buy when first candle of 15 minute is green

Sell when first candle of 15 minute is Red

Buy when price trade in upside from both candle after 9:50

Sell when price trade below from both candle lower side after 9:50

If inside you get inside bar then also you have to wait for entry

Note : Only stocks from NSE F&O

Use Vwap or today high low till 9:50 for stoploss

Use Classic 4 pivot for Target or profit booking
