Stage Analysis – The Four Stages

****

Thread:

Examples of each of the Four Stages to help you learn Stan Weinstein's Stage Analysis method.

Also will help you understand what I'm referring to in my posts

#stanweinstein #stageanalysis #stocks #study

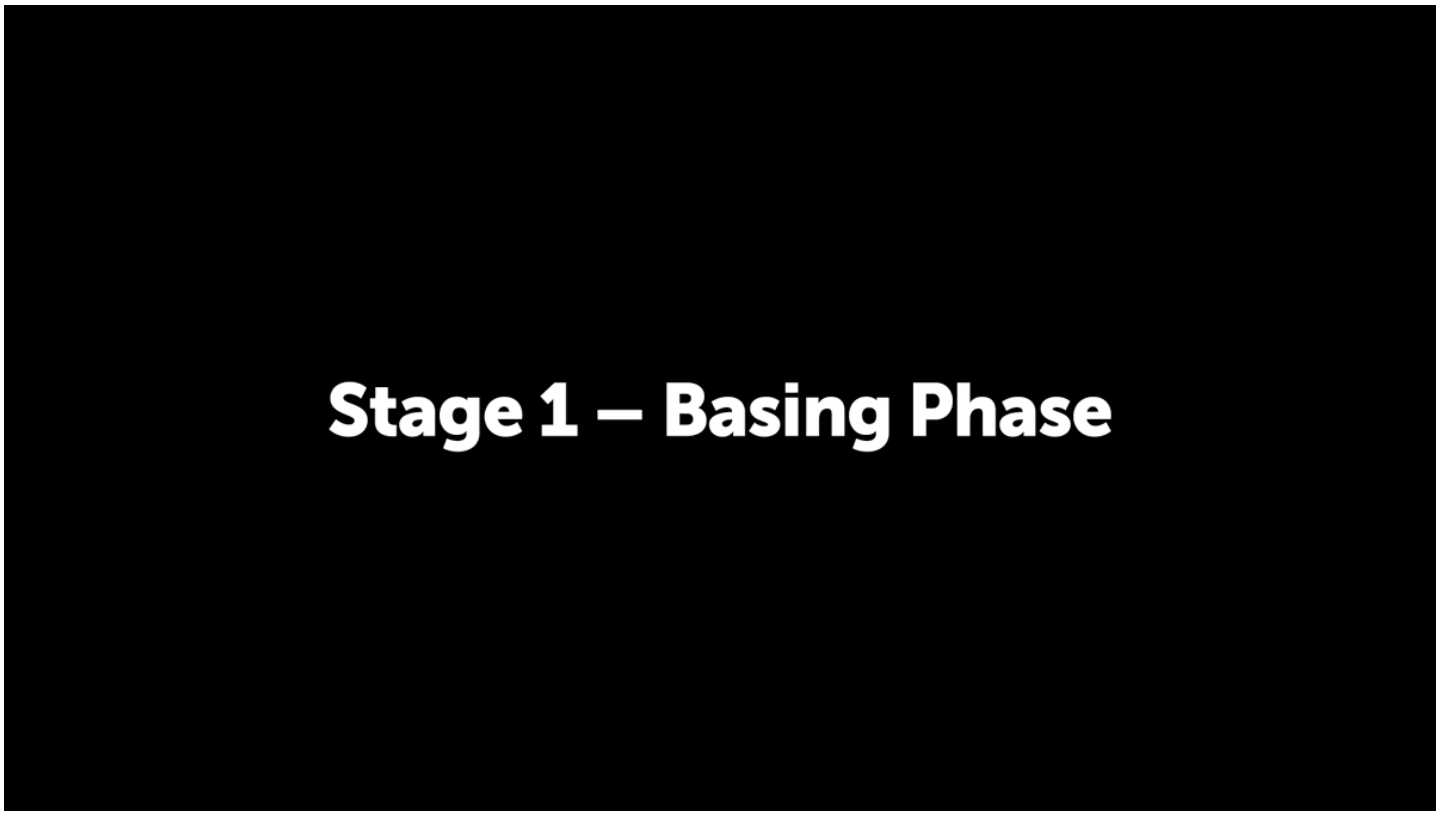

Stage 1 – Basing Phase

****

Stage 1A – Start of a base. Needs much more time.
Stage 1 – Basing Phase. May begin accumulation.
Stage 1B – Late in base-building phase. Watch for breakout.

#stanweinstein #stageanalysis #stocks #study

Stage 1 – Basing Phase

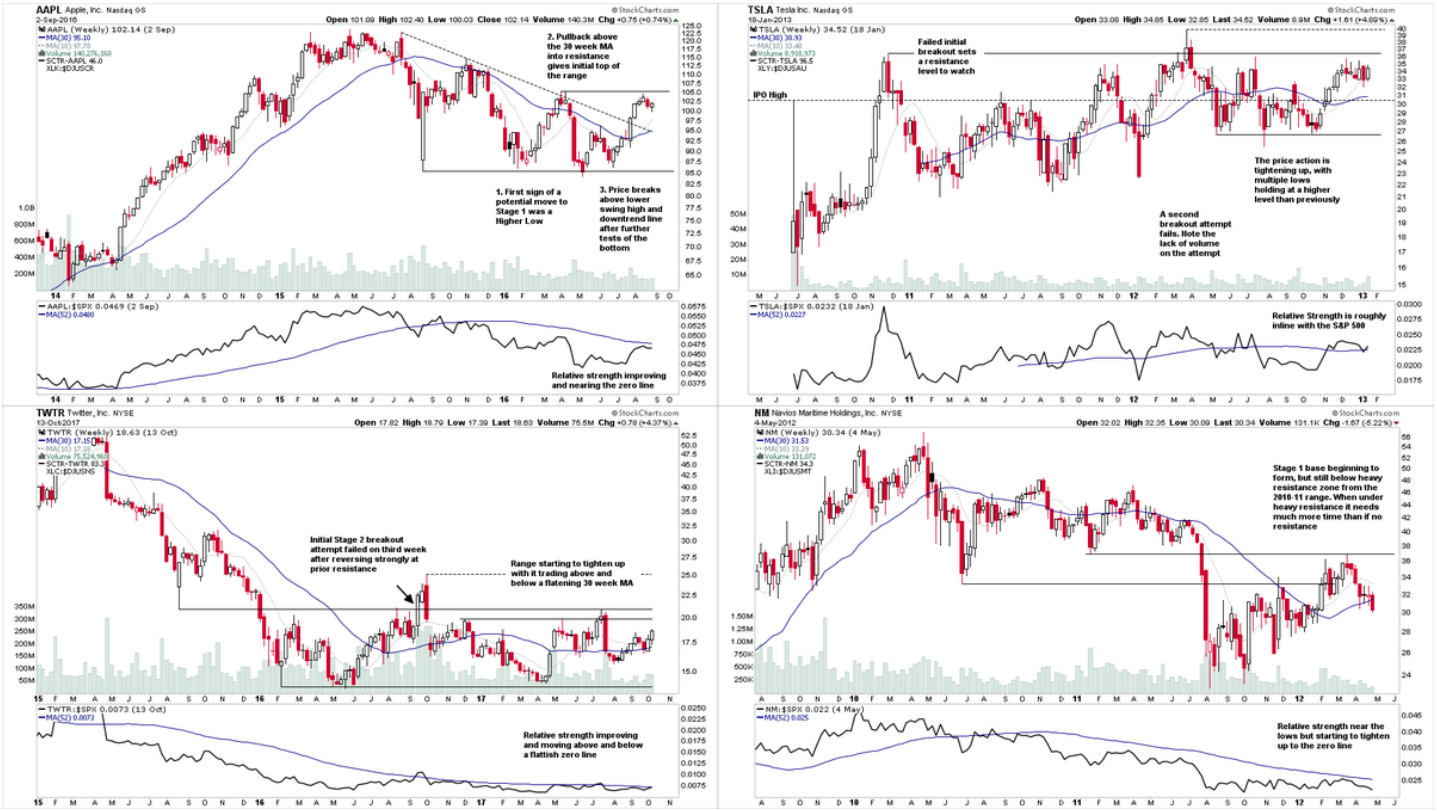

#stanweinstein #stageanalysis #stocks #study

> After stock XYZ has been declining for several months, it eventually will lose downside momentum and start to trend sideways. What's actually taking place is that buyers and sellers are starting to move into equilibrium...
>
> **Stan Weinstein – Secrets for Profiting in Bull and Bear Markets**

Stage 1 – Basing Phase

Examples of four stocks in different phases of Stage 1 bases.

#stanweinstein #stageanalysis #stocks #study #stage1

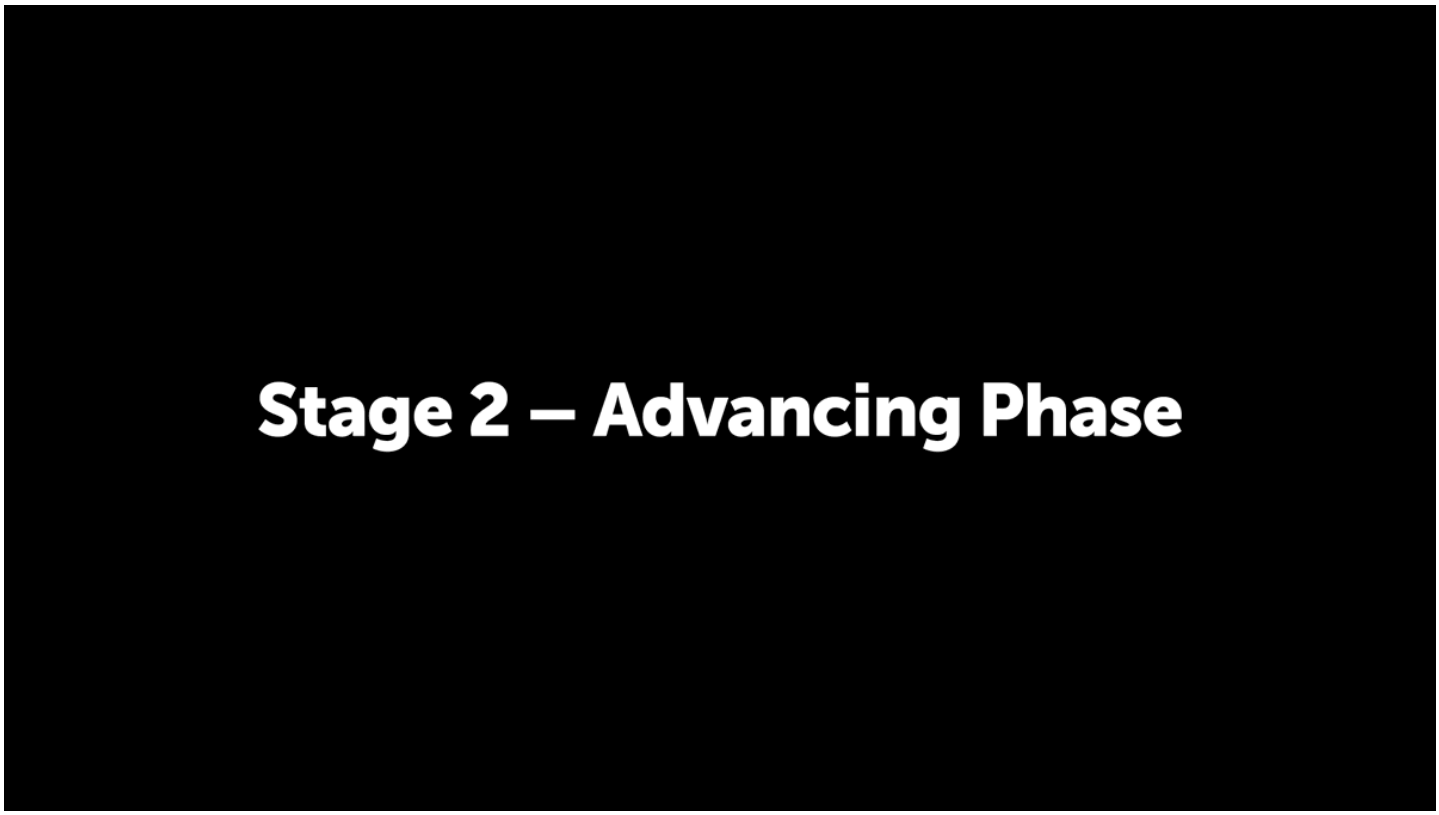

Stage 2 – Advancing Stage

****

Stage 2A – Early in uptrend stage. Ideal time to buy aggressively.
Stage 2 – Advancing Stage.
Stage 2B – Getting late in uptrend.

#stanweinstein #stageanalysis #stocks #study #stage2

Stage 2 – Advancing Stage

#stanweinstein #stageanalysis #stocks #study #stage2

> The ideal time to buy is when a stock is finally swinging out of its base into this more dynamic stage. Such a breakout above the top of the resistance zone and the 30-week MA should occur on impressive volume. This is the start of the advancing Stage 2 uptrend phase. However, before the really dynamic part of the advance gets rolling, be aware that there is usually an initial rally followed by at least one pullback.

Stage 2 – Advancing Stage

Examples of four stocks in different phases of Stage 2 advances.

#stanweinstein #stageanalysis #stocks #study #stage2

Stage 3 – Top Area

Stage 3A – Looks as if a top is starting to form. Be sure to protect holdings with a close stop.
Stage 3 – The Top Area. Start to reduce positions.
Stage 3B – Has become increasingly toppy. Use rallies for at least partial selling
#stanweinstein #stageanalysis

Stage 3 – Top Area

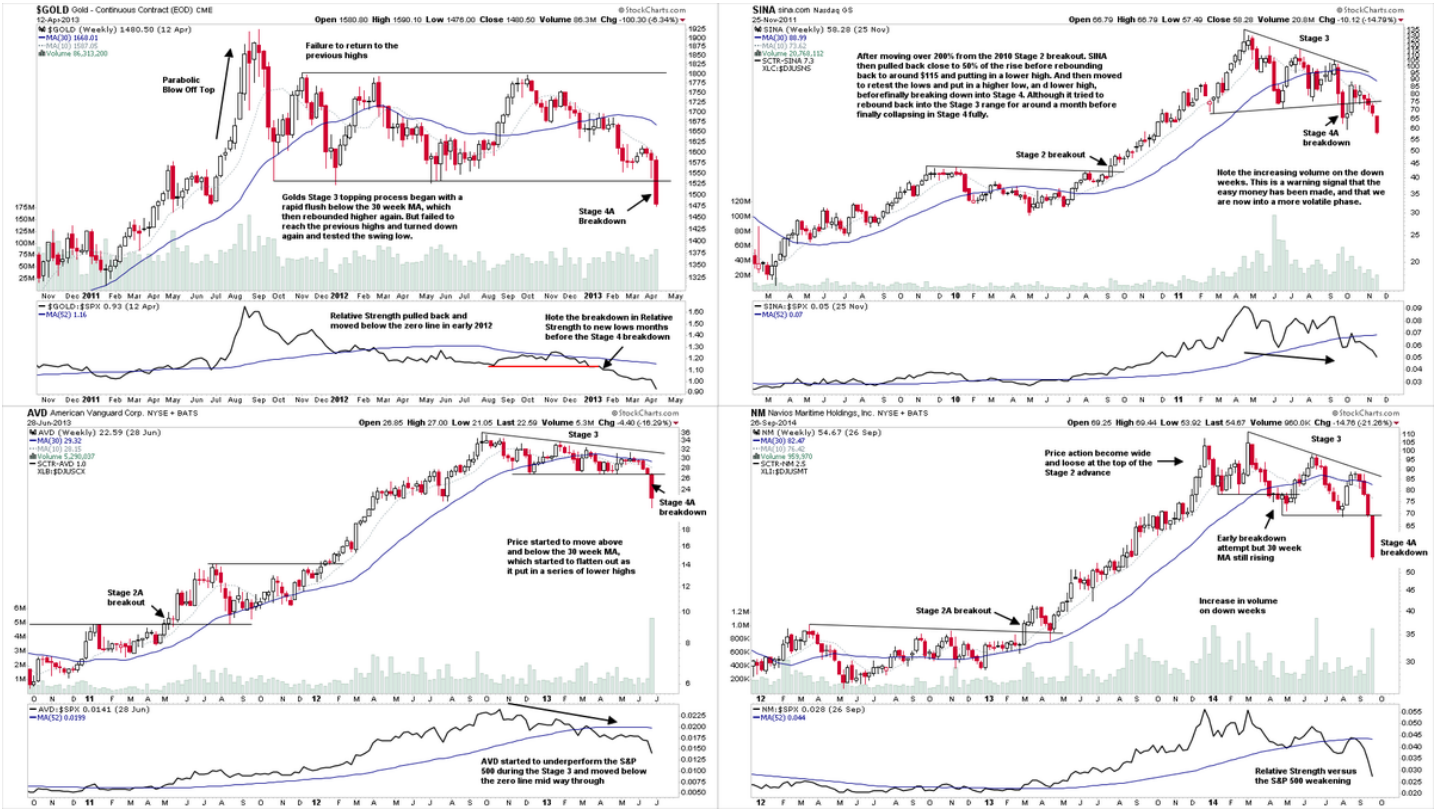

#stanweinstein #stageanalysis #stocks #study #stage3

> Eventually, all good things come to an end. In the stock market this takes the form of a Stage 3 top as the upward advance loses momentum and starts to trend sideways. What's going on beneath the surface is that buyers and sellers are once again about equal in strength. In Stage 2, the buyers were far stronger and overwhelmed the sellers. Now that the advance is ending, the stock is in equilibrium and the mirror image of a Stage 1 base starts to take shape.

Stage 3 – Top Area

Examples of four stocks showing Stage 3 tops.

#stanweinstein #stageanalysis #stocks #study #stage3

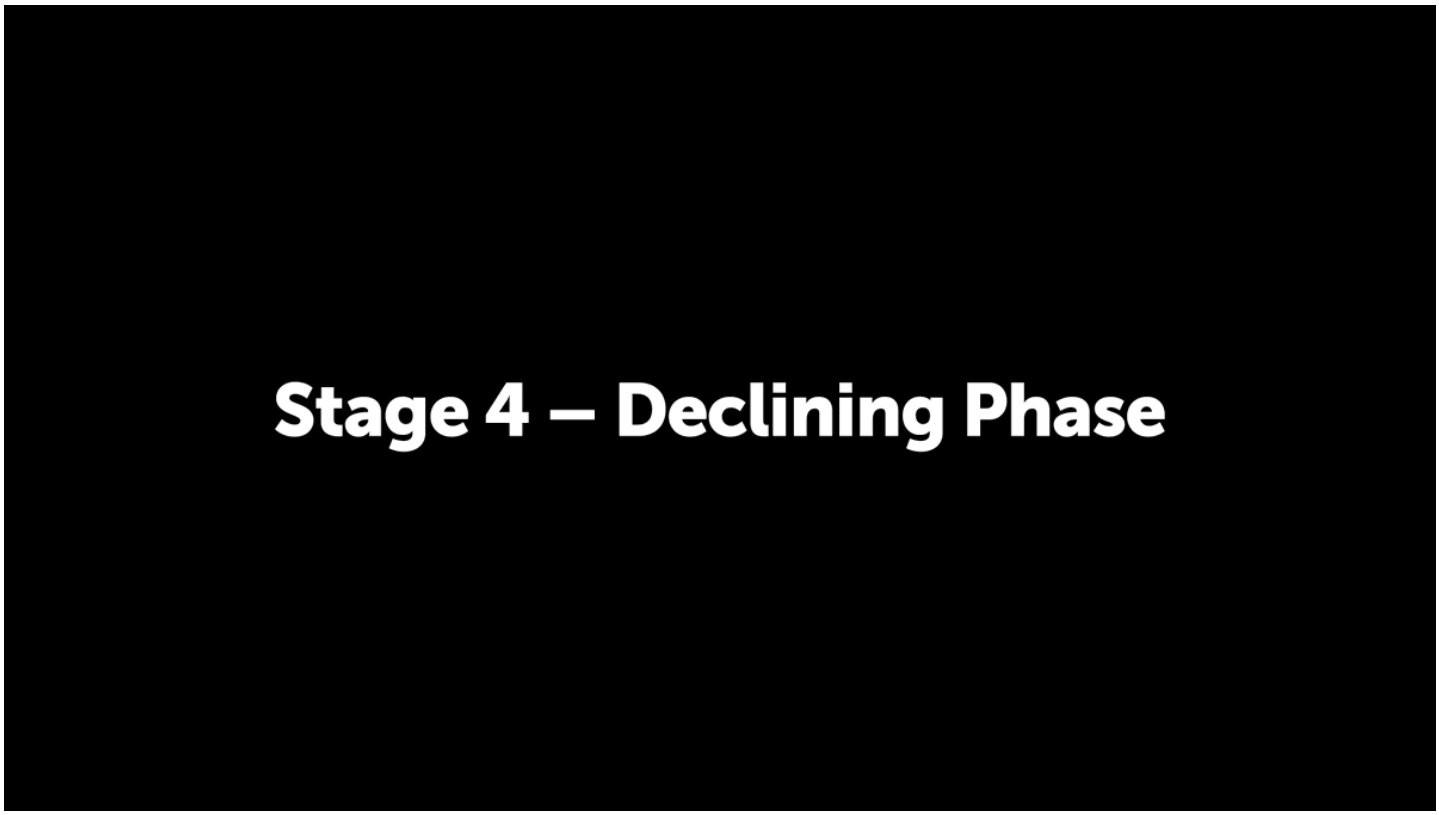

Stage 4 – Declining Stage

****

Stage 4A – Stock has entered Downtrend Stage. Close out remaining positions.
Stage 4 – The Declining Stage. Avoid on the long side.
Stage 4B – Late in downtrend. Much too soon to consider buying

#stanweinstein #stageanalysis

Stage 4 – Declining Phase

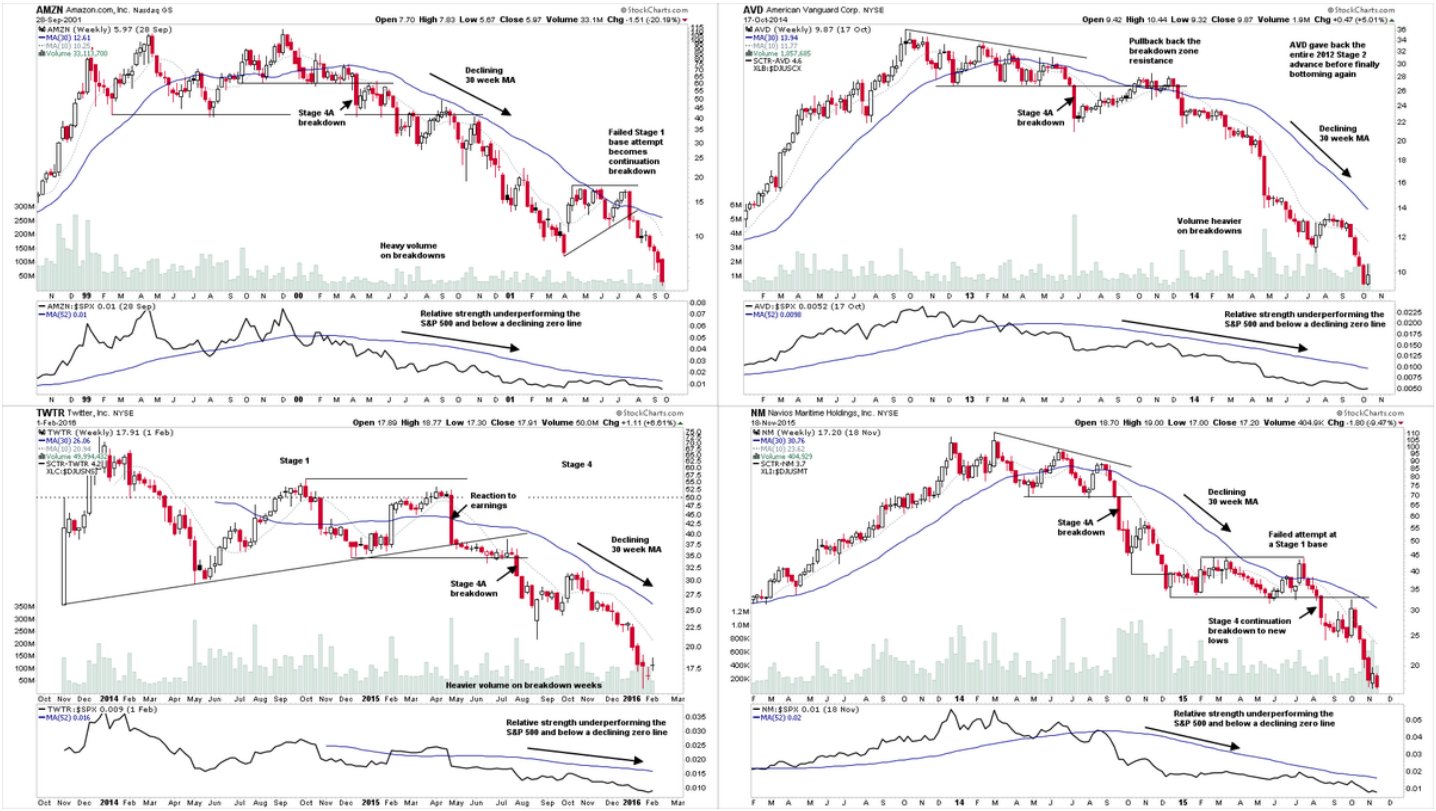

#stanweinstein #stageanalysis #stocks #study #stage4

> I've seen many cases where a stock moved into Stage 4 on relatively light volume and dropped substantially in the months ahead. Therefore, while a volume increase on the breakdown is even more bearish, don't ever let yourself get lulled into a false sense of security because the volume isn't heavy! One way or another, you should get out of the stock.

Stage 4 – Declining Phase

Examples of four stocks showing Stage 4 declines and the characteristics to look out for.

#stanweinstein #stageanalysis #stocks #study #stage4

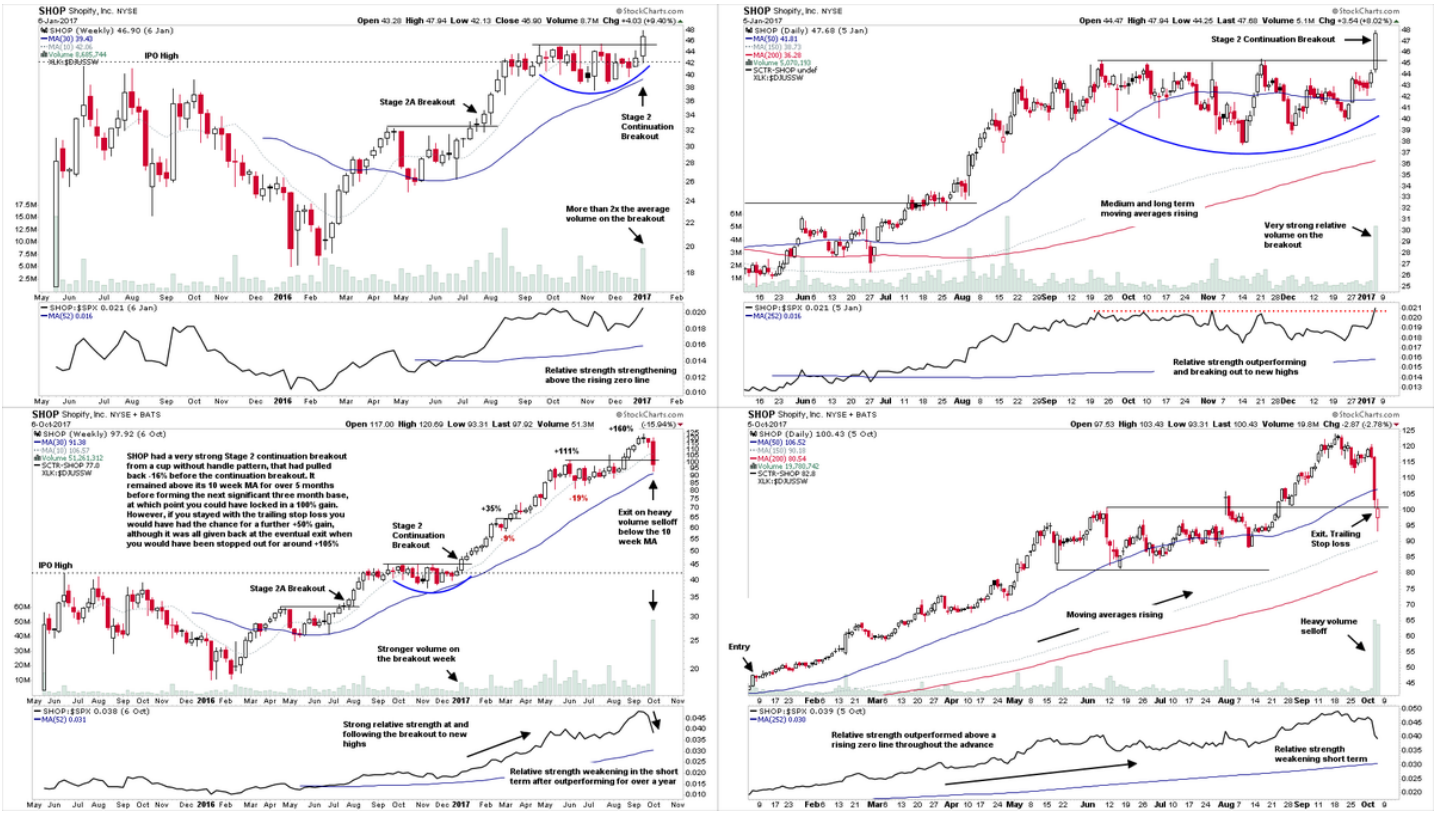

To learn more about **Stan Weinstein's Stage Analysis Method** I've created a video course which covers the examples from the thread above in more detail, and some additional content on the ideal entry points for the method https://t.co/S0eA6qQKLU

#stanweinstein #stocks #trading

After explaining the four Stages with detailed examples in the video course, I move onto the methods ideal entry points.

An example is the 2017 $SHOP Stage 2 advance, where I explain the Trader method entry point and how it would be managed.
