@SomeBitchIKnew

Random, but it seems that @DanCrenshawTX is a member of a group founded by Klaus Schwab, who is the architect of the "Great Reset" initiative. https://t.co/4FcAwqw7PQ

Other members include Pete Buttigieg, Tulsi Gabbard, and a whole slew of other politicians.

You've also got Alexander Soros, David Rothschild, Mark Zuckerberg, and Alicia Garza, among many many others.

Some of their ambitions include something resembling the Green New Deal.

And working with the UN to find entrepreneurial opportunities for refugees in other countries.

Their leadership includes Klaus Schwab, members of the UN, and a chairman of Ant Group in China that wants to build an Internet of Things of "inclusive and user-friendly technology."

They tout the SDGs from the United Nations.

And are incredibly involved with the Davos Agenda.

So. Uh. What gives, Dan?
