**Is HDFC undervalued ?**

**Market capitalisation of HDFC is 3,10,478 Crores. But HDFC houses listed holdings worth 2,19,437 Crores and several unlisted businesses.**

**FY20 profit was 21,435 Crores. Setting aside the holdings, HDFC is trading at a PE of 3-4.**

**Let's dig deeper. A thread.**

Outlook

HDFC group companies are leaders. But they command premium valuations.

HDFC is the best housing finance business. And it offers diversified exposure to HDFC group companies at much lower

valuations.

That is buying HDFC puts more assets to work for the money you invest.

While writing about this anomaly market capitalisation of HDFC was 3,10,478 Crores.

Now it is 4,78,402 Crores.

Still quite attractive but with a lower margin of safety.
