A good website to gauge the bias of the market.
We can raise the probability of our trade going right if we align our trade with the bias of the market.

Pdh was Resistance for a long time.  Down fall from PDH and took support PDL or always book profit near these levels.

Thread on how @ITRADE191 made 3 lakhs in 2 days.
I'm posting his chart logics here which he has shared with me realtime.
You will need:  1. Pivots
2. Vwap
3. PDL/PDH (Previous day high/low)
4. Advance/Decline Ratio.

Practice via these charts and logics and become consistent like him so that you can make profit daily.
Observe rejections at Pivots/PDH/PDL combined with OI analysis to improve consistency.
