#TATASTEEL

■ Stock is in a sideways channel since past 15y

■ Breakout above 750

■ A monly close above 750 will push the stock towards 950/1050 levels

■ Above that it would be a decade long multi-year breakout

■ Its going for 200/300%+ gains

- On yearly charts a triangle pattern breakout can be seen
- Rising iron ore prices are supporting the field
- All over the world major economies are giving out big infra push to get the economy going
- This rally is shaping well with the fundamentals and economic recovery
