Twitter Thread by Piyush Chaudhry

Gaps and Probabilities. A 2019 Tweet.

#GapTheory - Do the Gaps get filled?

As per Thomas Bulkowski's 2005 study Odds for filling of the following Gaps -

Common Gaps: >70%

However,

Breakaway Gaps: <5% Runaway Gaps: <20% Exhaustion Gaps: >70%

Categorize the Gaps correctly and Look for Counter Signals.
