A simple #swingtrading strategy

1. Whenever you see a stock in strong uptrend it will tend to take support on its 21 ema.

2. Always look whether the stock has taken support previously.

@kuttrapali @rohanshah619 @chartmojo @chartworldat

#adaniports #balajiamine #jswsteel

3. 21 ema will act as dynamic support in a trending market

4. Risk: Reward is favourable in such setups

5. 50 ema can also act as support which can be kept as stoploss for swing trading

6. Volume should be less during pullbacks .
