**Pick strong trending stock**

**in pullback - preferably near 61.8% or 50% retracement level look for bullish candle enter**

**take sl low of candle and sleep.**

**this is one of catching good stock in uptrend.**

**tried and tested in over more than 1000+ trades(on own money in last 13years)**

similarly u can do opposite

one example

#Nifty

didnt closed even above 50% of retracement

failed to touch 61.8%

failed to close above black candle high

what u had to do?

nothing - buy some put to protect portfolio or sell longs if u r not comfortable in shorting and wait for
