Twitter Thread by Piyush Chaudhry

In such a case, H&S can be either a continuation pattern or compound fulcrum. This is how to differentiate:

- if right shoulder is smaller than left, most likely a continuation H&S
- if right is same or higher than left, and the price is not coming to neckline, most likely CF

sir a doubt does head & shoulders work in down trend ? pic.twitter.com/dytYmbzOfp
