Dear @chartmojo

Out of curiosity, just gone through your timeline and prepared a data of your shared tweets in OCT'2020;

You will not believe the following numbers:

Charts shared = 29 (2 excluded due to splits)

Period = 8-oct to 30-oct'20

..

2/n

If min. 10k invested on your each design, then

Amount invested in Oct'20 = 2.91 lacs

Present investment value = 4.72 lacs

Maximum drawdown = 9%

ROI = 62% in 200 days

Annualized ROI = 147%

You ROCK brother

...

I've prepared a sheet for all your Oct'20 tweets; It was so much learning on the charts as well as on the data-part; Please keep on the good work.

Sheet link:
