In this thread, I'll walk you through Shannon's Demon.

This is an investing "thought exercise" -- posed by the great scientist Claude Shannon.

Solving this exercise can teach us a lot about favorable vs unfavorable long-term bets, position sizing, etc.

You can move a billion dollars in bitcoin for only \$1.75 as a transaction fee. ■

Someone moved \$1 billion of Bitcoin last week and paid a \$1.75 transaction fee.

Yet some people will still say it\u2019s worthless as they wait for their bank to open on Monday just so they can pay \$30 to transfer \$5,000 that won\u2019t get there for a day or two.

Disruption is coming.

Meanwhile, your bank account is up:
