these low-volume pullbacks after the breakout are a common occurrence. However, what is more, important is the stock's reaction after a pullback. It must bounce back within a few sessions strongly to scale up the size.

Correction \U0001f447

During upward breakouts, I have to consider price targets and not %age targets. Therefore the target comes out to be 8540 and not 8900 as mentioned before.

The chart stands updated.
