Time to update reading on #tataelxsi. Note where the last fall was supported. Perfectly near the previous arc BO level. We will make some retracements here & there but now seems to be going for 10391. 3rd arc formation in process & looks very similar to the previous one https://t.co/KwBFN6fkKk

This is line chart based arc I plotted a few days ago to see where does the target of 2nd arc completes. We got ~9200(+/- 100/-) Switch to candles. See rejection area. Arc on candles is not really ideal but on line it is. No view above 9200! MAs need to catch up. #TATAELXSI pic.twitter.com/WNJRZZedrj
