**#TATAPOWER** futures on daily charts, finally breaks out of the tight range. Open counts are at 150 and 187. https://t.co/IPshkD3FeA

<u>#TataPower</u> on daily charts - a breakout above 126 will be very interesting. It is bullish on higher boxsizes and has given a reversal after a pullback on lower boxsize. Price charts and RS charts self-explanatory <u>pic.twitter.com/9ulYjvBVza</u>
