Big changes are happening and bigger changes will happen soon all due to technology. The information age helped us reach what is being seen as a technological revolution and we are currently living through it. 1/6

More ■■

Within a few years, there's going to be major changes in how we live our lives:

Public transportation being replaced by the likes of Uber.

Apartment and hotel rentals being replaced by the likes of AirBnB. 2/6

More ■■

Restaurants being replaced by the likes of Deliveroo/Zomato.

Retail shopping being replaced by the likes of Amazon.

Traditional vehicle driving replaced by autonomous vehicles.

Internet file sharing being replaced by the likes of Bittorrent. 3/6

More ■■

Traditional farming being replaced by robots.

Paralegal and medical research/diagnosis being replaced by AI.

Manufacturing being replaced by 3D printing.

ISPs being replaced by free worldwide wireless Internet. 4/6

More ■■

Wholesale shipping being replaced by the likes of Alibaba.

Movie theaters and movie rentals being replaced by the likes of Netflix/Hulu.

Finance being replaced by #bitcoin.
5/6

More ■■

All these things are happening as we speak. They along with future technology, will slowly take over almost everything in our lives.

One thing that is abundantly clear is that governments and banking institutions will not be part of the revolution.
