Here’s an interesting rig - MacBook screen sharing a Mac mini which is running Xcode and testing suite which auto runs app on several devices - personal build server. You could never connect the mini to a display from moment of purchase, ever

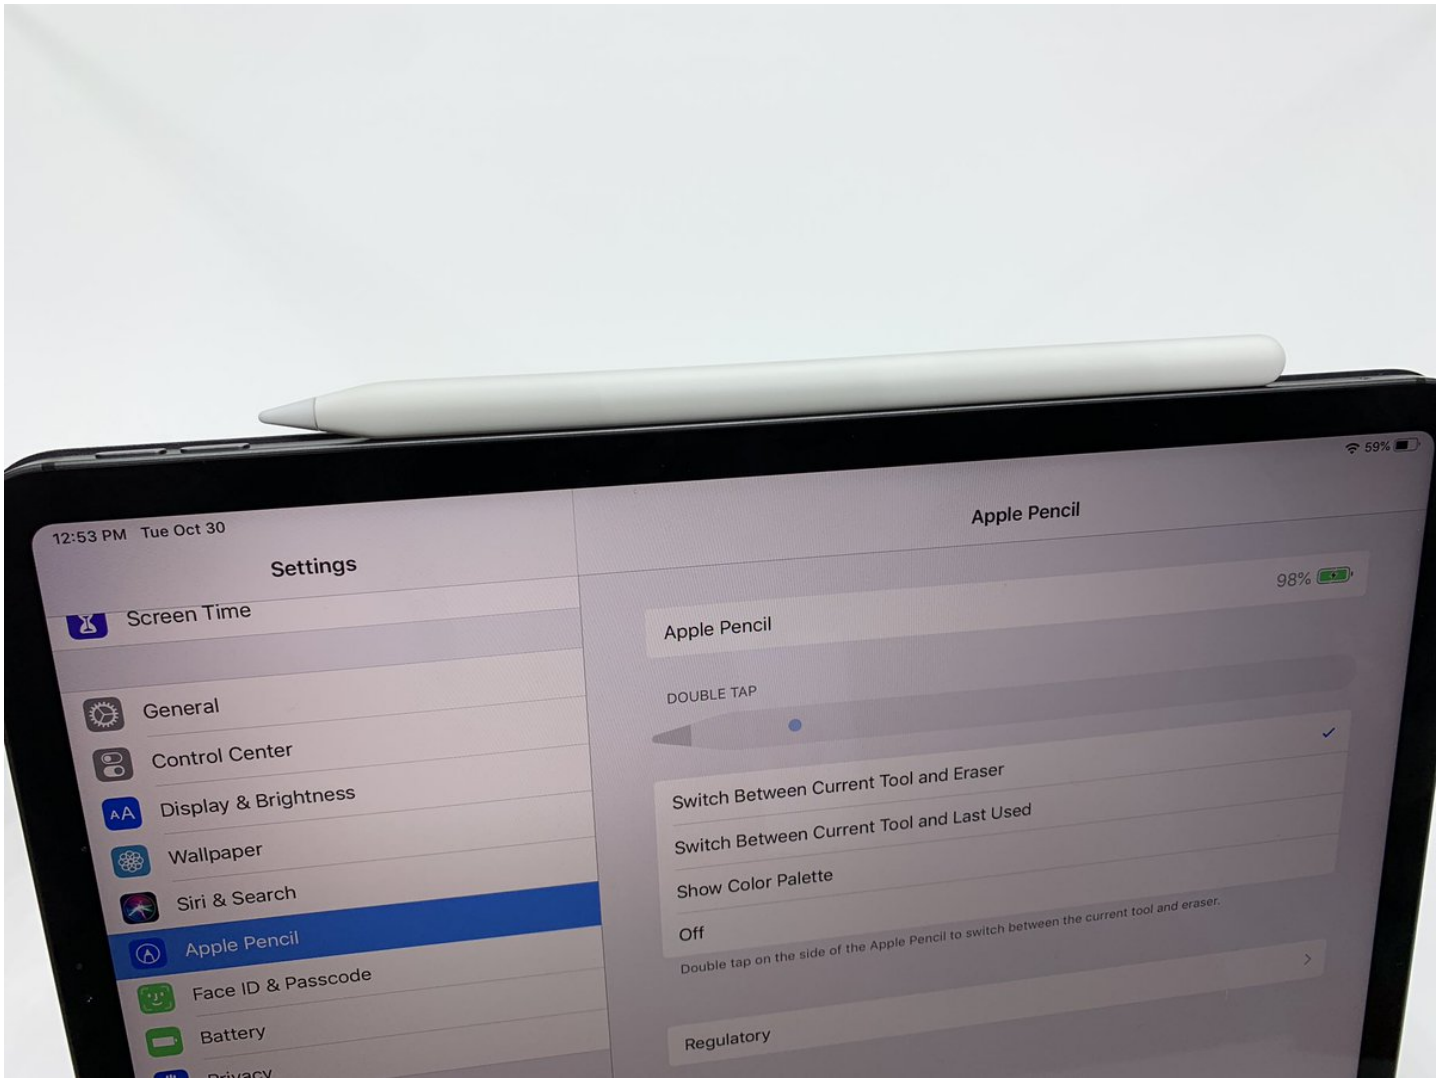

If you cover the Face ID camera it will tell you it’s covered and where the camera is located with an on screen arrow

Here’s the iPad Pro’s new Apple Pencil mounting

Oh and if you look closely you'll see the new pencil menu
