Don't change your trading rules!
https://t.co/Hg0BnWYzQv

"Don't change the trading rules after every trade."

If you do change them frequently then this thread is for you.

Let's talk about the law of large numbers and how it benefits traders to be profitable.

Position size for a positional trader
https://t.co/Hgi2NstoE2

If you are a Positional trader then Keep your position sizing as such that even if the stocks open 10% down, your account should not be down more than 5-6 %.

Lets understand how to deal with risk when you are a positional trader,

Volume climax and how to benefit from it.
https://t.co/qRojaTfbFH

When tops are formed , two things happen The public is buying and the big boys are selling, and vice-versa when bottoms are formed.

In simple words Volume climax is the last "AHA" movement for the public before the stock make a top or bottom.

"90% of the traders lose money, But do they lose it all the time?"
https://t.co/zLyGKte4WH

"90% of the traders lose money, But do they lose it all the time?"

Most of them do make money, its just that they give it all back.

Lets analyze why and how a trader makes and loses money
[Thread]:

How position sizing can affect your trading performance?
https://t.co/H9UBHy0CSt

How position sizing can affect your trading performance-

Assuming that you are trading a Trend-following system with Big RR and low win-rate.

For example, assume that you risk one percent per trade on a 100,000 account
and you have 20 straight losses.

— Trader knight (@Traderknight007) December 1, 2020

Life
https://t.co/kLyHOccTVd

Life is a continuous journey of going through peaks and troughs of Happiness and struggle.

We can only see the Happy part of other lives, but ignore what they might have gone through to achieve that.
