@Casey

does anyone want to take over the lease on my Tesla Model 3 Performance?
-17 months left on lease.
-$769.38 monthly payment
-NO option for buyout
-25k miles left on lease (thats a lot)
more info in thread

its a truly great car (maybe my fav ever) but we have a minivan for family vehicle and i only really need a big surf truck to beat on and haul my gear so i just dont drive this enough to justify having it (in 19 months ive put only 5k miles on it)

in flawless condition. custom chrome delete, window tint. every option Tesla offers. SERIOUS CONSIDERATION ONLY. must have good credit (so telsa finance will let you take over lease). if out of state then costs might change so best for CA people. LMK!!!

*not accepting dogecoin or GME stock

also just kind of lack the maturity to own a car this fast and fancy. this was me 3 days ago in a more casey-appropriate vehicle

so much happiness (not so much on her part)
