Top 7 Things You Must Do Differently to Achieve Massive Success as a Trader by Jesse Stine

(Jesse turned \$46,000 into \$6.8M in 28 months, netting him a return of 14,972%)

Learn How to Sell

- "Most investors spend 99% of their time studying what to buy and when to buy it."
- "If you don't become passionate about the art of selling, you might continually lose a majority of your gains."
- "Fear is NOT a profitable sell signal"

Focus on Weekly and Monthly Charts

■ "Smart money billion dollar hedge funds and institutions base their buy and sell decisions almost exclusively on longer-term weekly and monthly charts."

To make big money, we have to know what big money is doing.

Wait Until Everything Lines Up

■ "There's only one way to put yourself in a position to hit a grand slam. Wait, wait, & wait some more until most of the technicals line up in your favor. By waiting until EVERYTHING lines up, your odds of massive success go through the roof."

Invest on an Island

■ "Ignore the noise and make your own decisions."

■ "By eliminating all the 'noise', you open up the possibility of massive success."

Buy Individual Stocks, not Mainstream ETFs or Mutual Funds

■ "To beat the market, spending time on specific stocks is critical for your success."

Become Obsessed with Charts

■ "Your only focus should be on making money from increasing PRICES. Unlike many others, your goal should never be to feel 'all warm and fuzzy' about a fundamentally strong company that you have great love for."

Price pays. Opinions don't.

Become a Sentiment Stud

■ "As you master your emotions, you'll find yourself buying boredom and fear, and selling euphoria."

■ "The investors making billions are the ones who are buying hand-over-fist during each global crisis. They are buying fear. They were the ones selling all of their holdings when the news was most euphoric."

Key Takeaways:

- ■ Learn how to sell
- ■ Focus on the weekly/monthly time frame
- ■ Wait for your pitch
- ■ Remove distractions & noise
- ■ Focus on individual names
- * Obsess over charts
- ■ Understand sentiment
