### The only BREAKOUT scanner that I use day in and out...

### for both LONG TERM BREAKOUTS and...

### POSITIONAL TRADES based on the CCI Indicator■

### Ready to learn how I use it?

### Let's go■...

1■ Since the scanners are based on CCI, let's learn what's CCI first ■

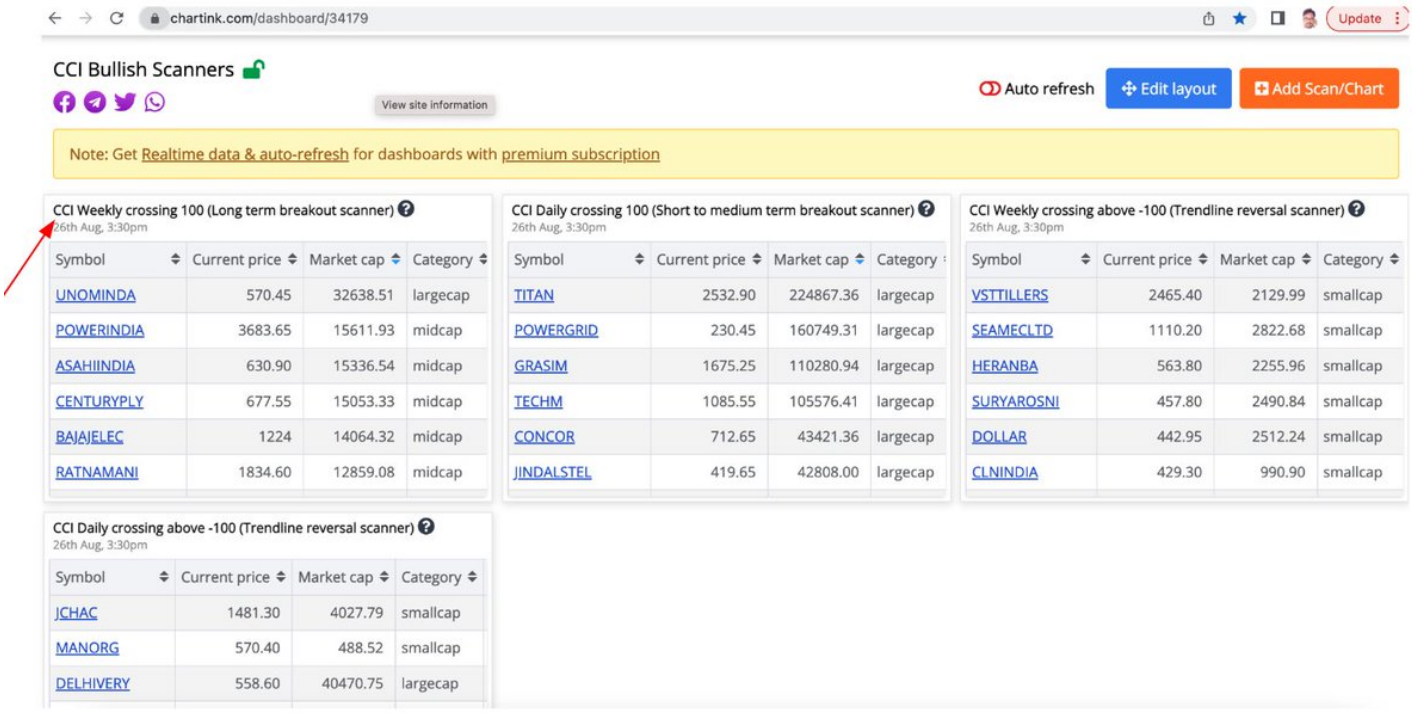

The most important diagnostic tool for me that signals turning point in stocks. It’s very simple to understand, so give it a try after watching the video.

https://t.co/zJNTxD1aa6

2■ The LONG TERM breakout scanner which is based on the weekly timeframe is simple and can be used to identify

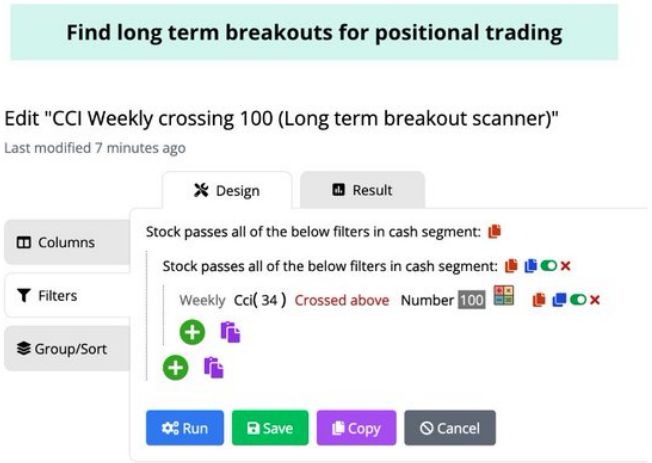

- Positional trades
- Multibagger Ideas (don't forget to check the rules in 3)

# My CCI based scanner

3■ Rules to find LONG TERM breakouts■

# CCI(34) Weekly crossing > 100

- Focus on stocks coming out of minimum 2-3 year downtrend. The longer the duration the higher the chance of greater returns
- Look for massive increase in volumes
- Look for companies with stable/steady increase in Sales/Profit
- Increase in OPM will be excellent
- D/E ratio < 1. No debt will be excellent
- Horizontal breakout into all time highs will be superb

4■ Watch the details in this video as to how to use this LONG TERM breakout scanner.

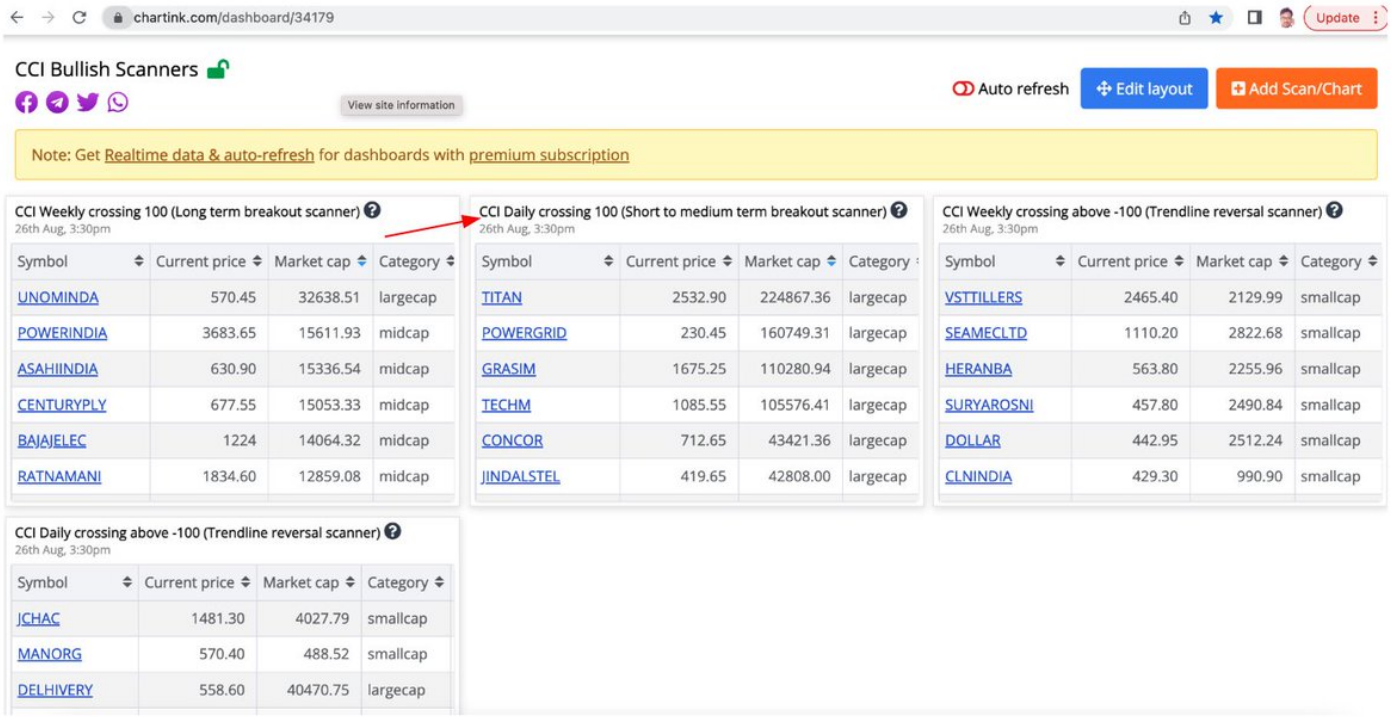

CCI based breakout scanner to identify swing trades/positional trades/investment ideas. With some effort you can find the next potential multibagger!

https://t.co/Jnum1soExp

5■ The SHORT TERM breakout scanner based on daily is even simpler and can be used to identify

- Swing trades
- Positional trades

Latest Cci( 34 ) Crossed above Number 100

Run | Save | Copy | Cancel

- Focus on stocks coming out of minimum 2-3 month short term downtrend. The longer the duration the higher the chance of greater returns

- Stock must be in weekly uptrend as well

- Look for increase in volumes

**Optional**

- Look for companies with stable/steady increase in Sales/Profit

- Increase in OPM will be excellent

- D/E ratio < 1. No debt will be excellent

- Horizontal breakout into all time highs will be superb

7■ Watch the details in this video as to how to use this SHORT TERM breakout scanner.

https://t.co/Jnum1soExp

8■ Now that you've watched the video and understood the rules here is the scanner link itself ■

If you want me to make a thread on how I use the reversal scanner let me know in the comments!

https://t.co/KfKc7V0nGD

9■ If you've read still here don't forget to watch this video where I explain how to increase conviction in picking and holding stocks■

https://t.co/O9phWlyUYZ

Learnt something? If yes, please■
