Index

- 1) Importance of Trend
- 2) Time Frame Importance
- 3) Bullish Day Signals
 - Candles, VWAP, EMA, Patterns, Resistance BO
- 4) Bearish Signals

Imp - Explanation in Charts Only

Importance of Trend

"Trend is our Friend except at the end when it bends"

Trend Following importance explained in 4 charts -

Going against the trend stands very less chance of success as explained in this chart that cover 5 days of uptrend -

Time Frame importance -

- 1) 3 min - For Execution
(indicators provide early signals and less reliable)
- 2) 15 min - to look at trend of week, Support and Resistance of last 4-5 days
- 3) Daily - to check current trend and Short Term S-R (More reliability)

Charts -

Bullish Day Trading Signals

- 1) First Big Green Candle

First candle is always a good signal and trend setter for the day. Trading in direction of that candle have more success chances

E.g Reliance Big candle on 9 March, Entry with SL below first candle

Success Rate > 60%

2) VWAP Reaction -

For first 15 min best indicator is VWAP -

1) Chart Reaction with VWAP on a bullish day is explained in 4 charts here -

3) 10-20-50 EMA Reaction -

Only on steep up moves, charts get support by 10 ema and do not break that. like 8-10% pump

Bounce from 20 Ema support is a good entry point with SL below low of last 2-3 candles

EMA Confluence and Crossover Entry

Explained with 3 charts -

Candles - (Useful on Bullish Day)

- 1) Breakout Candle
- 2) Dragon Fly Doji on consolidation - Enter in next candle once the price is above the high of Doji and keep SL below low of Doji
- 3) Bullish Engulfing

Explained in 3 charts

Pattern/Signals on Bullish Day -

- 1) Ascending Triangle Breakout - Most Common
- 2) Resistance Breakout
- 3) New High of Day
- 4) Bounce from last high of Same Day

Explained in Charts -

Some Important Points -

- 1) Never Trade against the Big Candles
- 2) Never trade against the trend
- 3) Never trade without SL
- 4) Don't move SL accept it
- 5) 1:2 Risk Reward is minimum to take trade
- 6) 50% Win Rate is excellent
- 7) Try to make profit according to capital Only

Signals to Enter Short Trade -

- 1) VWAP Signals

Look at this reliance chart -

- First Big Red Candel is always a good short signal
- Continuous rejection from VWAP is good to enter short

2) VWAP Rejection support broken

3) Bearish Engulfing - Big Red Candle

4) Go Short on First Candle

5) EMA Confluence and rejection

6) Below Support Entry

7) Below day's low enter short trade
