**Charts Time!**

**Follow the thread**

**\$SPY \$SPX \$QQQ \$JETS \$NVDA \$AMZN \$XLE \$XLF \$PLTR \$IWM \$TRAN \$MJ**

**\$SPY**

still looks very bullish on weekly, i expect it to move to 400 early next week

**\$QQQ**

#QQQ similar on weekly, if it dips anywhere close towards 320, buy weeklies and monthlies as its gonna go right back up, below this line though we'll see what happens

\$IWM

small caps have absolutely been on fire #IWM since elections, do you think the run continues?

\$JETS

#Jets monthly chart - check out the base range it created since 2017 until pandemic, 28-32, looks like its creating a nice long pattern and trying to go back to that range, lets see if it continues and breaks 28 again

\$XLE

#XLE back to its last summer high, above this we can see a run towards 55-60

\$XLF

Banks index continue to impress, moved above the pre-pandemic highs finally, this is still very bullish and continues to grow

\$TRAN

Transports breaking from the current channel, i took some profits yesterday, but looks like it could start something special

\$MJ

#MJ needs to hold here

\$TSLA

#TSLA holy grail setup falling wedge, can start a new run towards 900+ again

3552, after that we can see a nice run again

\$CRM

#CRM disappointment last week, but still inside the channel, look for some continuation next week, earnings next week

\$PLTR

#PLTR looks beautiful on the holy grail falling wedge setup, looks like it can test 40 again by march

Thank you for viewing!

Follow and subscribe for weekly charts :)

Have a fantastic weekend

p.s. Stonks only go up!
