CHEAT-SHEET

Multiple Confirmation short.

A Short Entry that we shared in 2020.

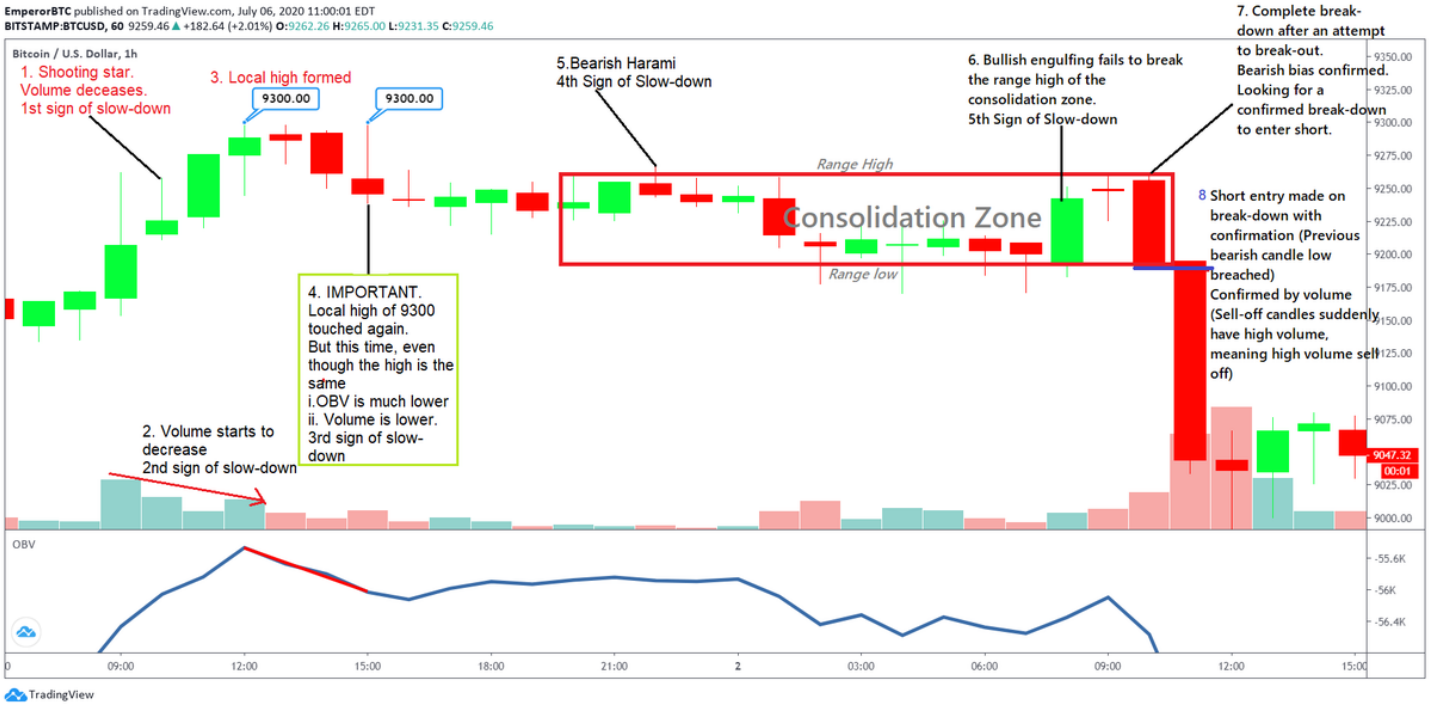

Study it point wise.

1. Bearish Candle type and lowering of volume on Price rise.

2. OBV divergence.

3. Accumulation with Bearish candles and Volume increase on Price decrease.

STUDY IT!

Explanation

1. When price increases with a decreasing volume, it's bearish.

2. OBV, On Balance Volume should be correlated with price.
If price increases without similar increase in OBV, it's bearish.

3. During consolidation, if the volume increases during dumps, it's bearish
