The is a tech bubble in the stock market, and it will burst soon. The question is, which of the #NGS companies below will come out stronger from the stock market tech bubble bursting? \$ILMN \$PACB @nanopore @MGI_BGI

Looking at the NASDAQ for the last 5 years, there was a big drop in March 2020, triggered by the first wave of worldwide #COVID19. The tech bubble was already inflated back then. But the market recovered with a matter of weeks, and kept climbing up.

By 9/8/2020 there was another attempt of a correction, mostly #COVID19 related, but again, with a highly inflated tech bubble, the market recovered and quickly jumped another 1,000 points (around 11,800):
