■ BUY ALERT \$CDON +23% ■

\$CDON was founded in 1999 and was part of the Qliro group until September 2020

■■ It was then spun out and started operating as a fully independent retailer

■ It is now a leading e-commerce player, but is still valued as a brick & mortar retailer

The company generated most of its revenue from its own sales (first party sales)

■ It is now moving towards an “e-commerce platform” / marketplace positioning where merchants retail products and send these to clients

The Nordics largest marketplace

Following \$AMZN's example, \$CDON is turning itself into a marketplace

- It doesn't sell products directly to consumers but takes a commission on sales
- It doesn't need to manage inventory or insure product quality
- It generates additional sales through advertising

The marketplace business model is inherently attractive

CDON

Revenue earned through multiple income streams

- High contribution margin based on B2B revenue streams – gross margin close to 100%
- Merchants own the inventory and decide on price and campaigns on the platform
- Negative working capital profile driven by no inventory and deferred payments to merchants for goods purchased on the platform
- Digital and technology driven business model with scalability in operating expenses

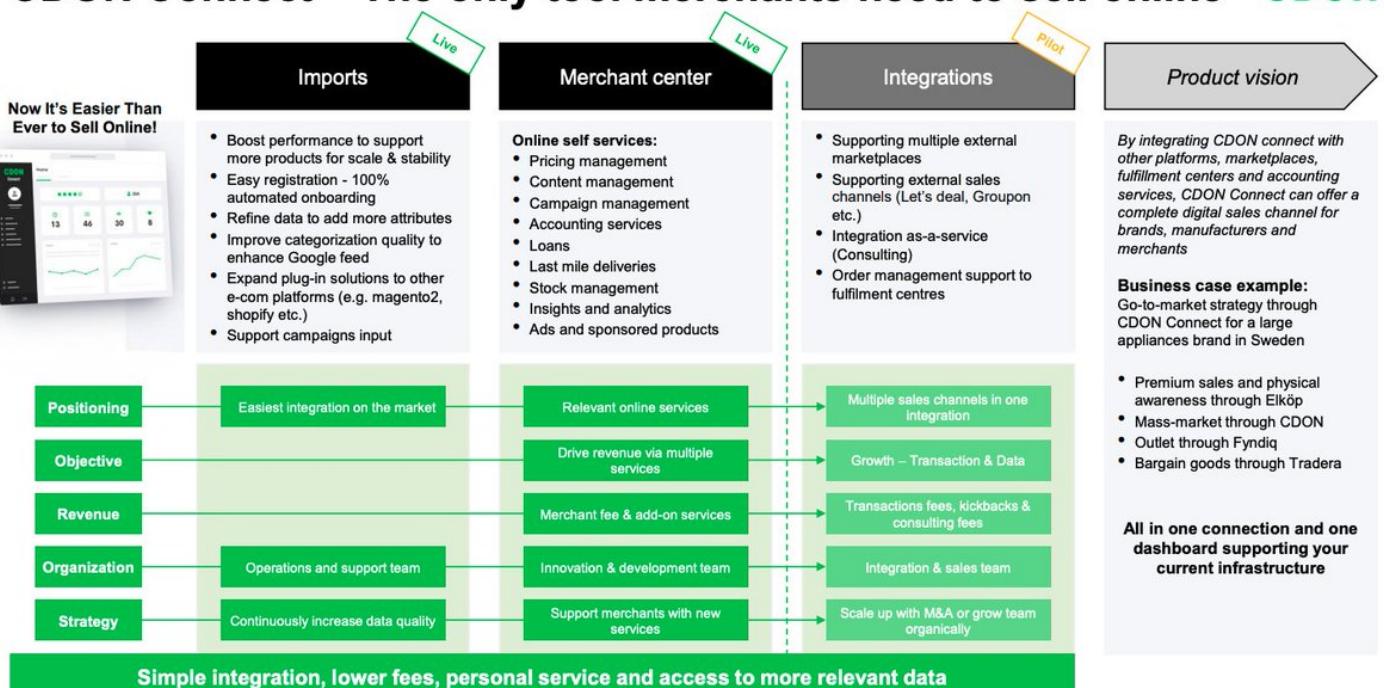

- **Transaction revenue:** A fee is charged from the merchant when a transaction is made
 - **Ad income:** Advertisements are sold on CDON, generating revenue regardless of whether a transaction is made or not. Advertisers can be both merchants and others
 - **Monthly subscription fee:** Merchants are to be charged with a monthly fee
 - **Financing commission:** Payment solution provider paying a commission on income earned
- All revenue from the marketplace is made without selling own goods and the related risks

In order to attract and retain merchants, the company is developing a range of tools

- Provides data-insights on products sold
- Integrations to \$SHOP and Magento
- Delivery, warehousing management

CDON Connect – The only tool merchants need to sell online

CDON

On the market side, e-commerce penetration is high in the Nordics

■■ Norway: 26%

Nothing too extraordinary for now - What is the pitch?

1■■ \$CDON was previously valued as a brick & mortar retailer as its activity-mix consisted mainly in conventional retail operations

2■■ Marketplace sales now account for 67% of total in Q3 '20, up from 40% a year earlier

3■■ Despite the change in activities, the company still trades at a PS of 1.5

For comparison:

■ \$OZON trades at a PS of 8

■ \$SE trades at a PS of 30

■ \$MELI trades at a PS of 28

Business model is proven by strong profitable growth

CDON

Rapidly growing marketplace

Significantly reduced working capital

Strong trend in operating profitability

- ✓ Technology driven and asset light business model
- ✓ Transformation to marketplace has significantly reduced risk, improved underlying profitability and cash flow
- ✓ Scalability and absolute decrease in operating expenses leading to high EBITDA growth
- ✓ Upside in ongoing initiatives to improve operational excellence further

9

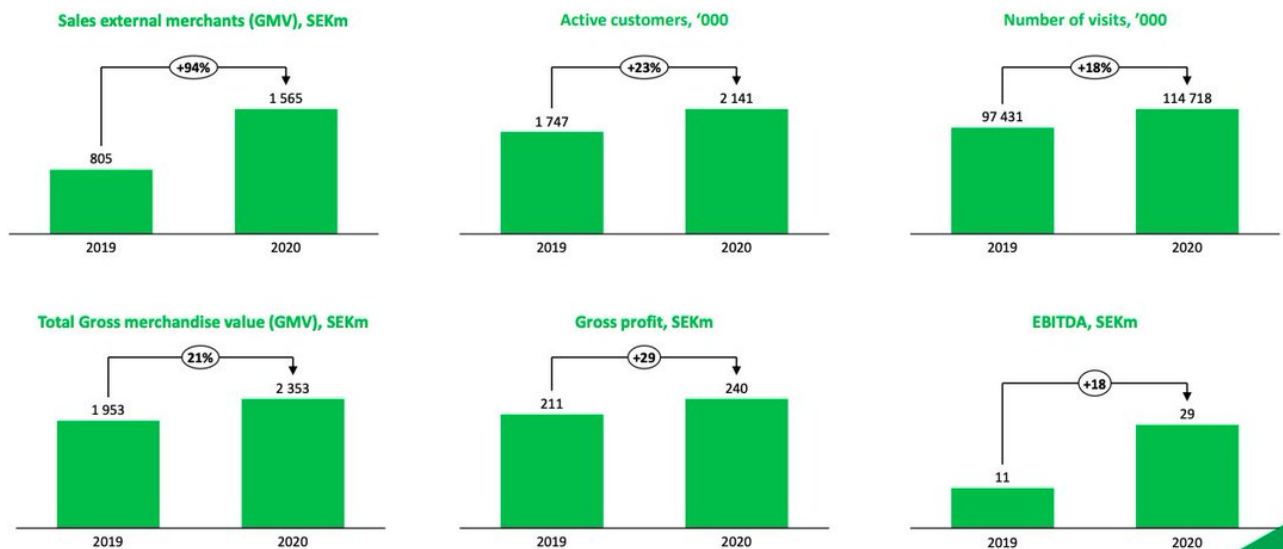

4■ Growth is overshadowed by the decline in its conventional retail activities

5■ When looking only at the “marketplace” sales, these are up 94% YoY to SEK 1.5B (\$ 180m)

Strong current momentum across several KPIs

CDON

LTM development as of Q3 2020
