I'll link new threads to this post as I tweet them. Don't go off my work alone, use content by others as well!

■ Fundamentals: behind the pump - THREAD https://t.co/FiVXdvQKHl

Today I share my view on what I believe to be the macro-economic factors behind the current $BTC surge.

Markets move in cycles, but every cycle has a driving force behind it. Until the tide turns, I follow that force.

I'll try and keep it as simple as possible. pic.twitter.com/EpIgtcetwe

■ Setting realistic goals & comparing yourself to others - THREAD https://t.co/Xt4v49Qpyn

What's your goal this bull run?

I'm personally just trying to give myself a head start in life.

Retirement or lambos are out of reach, but a stacked savings account & a down payment on a house would be absolutely amazing.

I'm feeling super blessed to be here in this market.

■ Price targets, support & resistance levels using Fibonacci - THREAD https://t.co/uFuJsKIhNA

$BTC, $ETH and $ALTS keep going up, but where does it stop?

Today I want to teach you how I derive my price targets and take profit levels using Fibonacci.

This method is not 100% accurate but very insightful nonetheless. pic.twitter.com/PhIKHCB3Ah

■ Patience & FOMO - THREAD https://t.co/3W8uas4rcx

Feels like the biggest FOMO many on here experience is not being in a trade.

Price goes down? Must rush into a short. Up? 10X long.

Sitting PA out until you get a good read is one of the best trades you can make.

■ Copytrading - THREAD

https://t.co/TxbDxTWauB

I wanna talk about copying other people's trades. Seeing some anger towards larger accounts after the crash, with people acting like they should have told them to sell, and all that.

I believe following other peoples trades is a recipe for disaster, for a few reasons:
