I know how much you guys like these, so here's a simple breakdown of how I look for short-term swing positions w/ [@TrendSpider](#) and [@unusual_whales](#)

With these, I'm looking to ride high-volume momentum w/ any actionable signal, as long as there are multiple trend confirmations.

**Choosing the Sector**

- Scan individual sector ETFs on Daily
- Choose Top 3 trading above the 20EMA
- Relative Strength is increasing

Choosing the Stock (Either / Both) (1H / 4H)

- Visible Pattern / Formation w/ potential upcoming breakout
- Volume Profile is at highest-volume swing range

Trend Confirmations (1H / 4H)

- Chaikin Money-Flow showing positive increase in money flow
- 20-Period RSI is below 65
- 20-Period RVOL is increasing w/ Bullish Volume & Price-Action

Flow Confirmations

- Flow Filters: Highest Premium w/ Ask-Side
- Flow for most recent day is Bullish (>60%)
- (Optional) UW Alert within recent week

Entry Requirements (1H / 4H)

- Wait for low-volume pullback
- TheSTRAT Pattern w/ high-volume increase

(Optional) Other Confirmations

- News or Events (Check Pre-Market)
- Earnings Releases (Check Pre-Market)
- Economic Events (Check Pre-Market)
