Here's how to use Tradingview to quickly compare multiple symbols from a particular sector among themselves, & with the index■

I've made a Tradingview watchlist of some sectors which do not find a place in any particular sectoral index. This list currently has 138 NSE stocks plus NIFTY. You can add more.
(List is a work-in-progress, & by no means complete.)

Sectors 🎯

You can select the index & names from a particular sector, & compare their price movements. One can visually eyeball outperforming names in that sector.

e.g. Ship-building MAZDOCK has given a 232% return in past 1 year, as against 7% for NIFTY:

INX SHIPS							
COCHINSHIP COCHIN SHIPYARD LTD	630.80 INR	3.56%	21.70 INR	2.773M	1.989M	80.161B INR
