Step 3: After adding the watchlists on the mobile app, refresh #TradingView on your desktop and voilà, you'll have the multiple watchlists you added on your mobile app directly on your desktop.

[Note: I added only 3 watchlists just to show you how it is done]

STEP 4: After you have added all the different sector watchlists, now its time to add the #stocks of that particular sector. This is not as tiring as adding the #watchlist with your mobile, you just have to copy and paste.
