WHAT? Dr. Connelly just said we are 72 hours into the President's diagnosis.... would mean positive test Wed AM. Working to clarify.

Doctor was just asked about this discrepancy & says Thursday night they got PCR clarity.....this did not clear this up and this would be a big misstatement. Also hasnt clarified why President would have started 48 hours ago...which would be prior to positive test.

Instead of reassuring the public, Walter Reed press conference sets-off new confusion and serious questions about President's #COVID19 diagnosis.
