**CCP EXPERT:WE CAN'T FIX TRUMP VIA WALL STREET,BUT WITH BIDEN...FOR THE PAST 30-40 YEARS, WE HAVE BEEN UTILIZING THE CORE POWER OF THE USA...THERE ARE A LOT OF DEALS.**

**"We know that the Trump administration is in a trade war with us,so why can't we fix the Trump administration? 1/**

Why did China and the U.S. use to be able to settle all kinds of issues between 1992 and 2016? [...] What is the reason? I'm going to throw out something maybe a little bit explosive here. It's just because we have people at the top. We have our old friends who are at the top 2/

of America's core inner circle of power & influence...to put it bluntly, for the past 30 years, 40 years, we have been utilizing the core power of the United States.

[...] since the 1970s, Wall Street had a very strong influence on the domestic and foreign affairs of the 3/

United States. So we had a channel to rely on. But the problem is that after 2008, the status of Wall Street has declined, and more importantly, after 2016, Wall Street can't fix Trump. It's very awkward. Why? Trump had a previous soft default issue with Wall Street, so 4/

there was a conflict between them, but I won't go into details, I may not have enough time.

So during the US-China trade war, they (Wall Street) tried to help, and I know that my friends on the US side told me that they tried to help, but they couldn't do much. 5/

But now we're seeing Biden was elected, the traditional elite, the political elite, the establishment, they're very close to Wall Street, so you see that, right?

Trump has been saying that Biden's son has some sort of global foundation. Have you noticed that? 6/

Who helped him (Biden's son) build the foundations? Got it? There are a lot of deals inside all these.

We know that in the '80s the Northeast (of China) was booming. Why? The Northeast is the root of the entire Chinese economy...China joined the U.S.-dominated world economy, 7/

especially on a large scale in 1992, and after 1992 we attracted investment on a large scale, so the Southeast coast developed rapidly and the Northeast declined [...]

In the post-financial crisis era, in the past 12 years, who are the companies whose stock prices 8/

and asset prices have risen the most? They are Alibaba, the "three Ma"(Jack Ma, MaHuateng, Ma mingzhe). The "three-Ma" led the way, followed by some other digital companies, they made a lot of money from the Chinese market. They have a lot of bargaining power, a lot of 9/

capital appreciation...Where does the capital appreciation that results from that part of the economic reform take place? Nasdaq. That's the previous way we were originally coupled with the United States. So the U.S. said they want to decouple with China now [...] 10/
