If you stand with Trump and haven't written to your Senators yet to ask them to object to the swing state electors, please do so. I am copying my letter in a longer thread below if you need an example. #stopthesteal

Senator ***,

I am a regular citizen and patriot and I'm frustrated and concerned about the election irregularities and the responses that I'm seeing from the Republican party in regard to Trump's justified actions to shine a light on the fact that this was a stolen election.

Most all of these swing states violated the Constitution by changing election law without the approval of the legislature. If there was no voter fraud at all, that alone invalidates this election. And yet the Supreme Court refuses to take it up. We are hearing now that Justice

Roberts yelled at his colleagues when they cited Bush v. Gore as precedent for hearing the case. He told them that at the time of Bush v. Gore we didn't have rioting in the streets. There is more at stake than ANTIFA starting phony riots in the streets on behalf of Soros and the

Democrats. We no longer have a Constitution if the Republican party sits idly by and lets Biden into the White House. I'm not for creating a new party but I can tell you this, there will be severe political consequences for the Republican establishment if this isn't fixed.

Why should anyone vote if state executive branches and judiciaries can just make up their own rules to rig any election? And if the courts have already given a pass this time, when we have them on tape shoving thousands of ballots into machines early in the morning

in a state like Georgia, enough to change the outcome of that election, then why will they ever stop it going forward. You can raise an objection to the Democrat electors in the swing states and fight for our Republic, for our Constitution. And you will become a leader in history

for re-establishing the Republic that our founders created, and that has been washed away by the establishment, the deep state, and our activist judiciary. As one of your constituents, I sure hope that you have the courage to stand up and fight.

I will continue to pray that God stops this nation from going down what looks to be a very dark path.

Sincerely,
***
