If there’s a “catastrophic event” as predicted by Brennan it may be a nuclear attack false flag. “News” from NK easily manufactured w/o verification. Seeing lots of news pointing to NK nukes in last few days. Would they nuke an American city to blame Trump + kick off Great Reset?

> BREAKING - North Korea to progress on nuclear submarines and "nuclear strategic weapons" launched from the sea that will contribute to increasing "long-range nuclear strike capability" (via @nknewsorg)
