You offer me 80% cost arbitrage (discount relative to Japan/EU/US) along with low confidence / assurance on Critical Success Factors and I won't give you a single NCE/NBE to discover, develop or manufacture. Capex/opex arbitrage is too low in the disruptive-science-pecking-order! <https://t.co/O2l8dK4BUv>

CDMO – Critical Success Factors

- Respect for innovator's intellectual property
- Immaculate regulatory compliance track record
- Superior technology investments
- Agility and supply-chain reliability
- R&D, documentation, data integrity and manufacturing excellence
- Client-centric mindset
- Adequate human capital investments (skill & capacity)
- Adequate research, development and manufacturing infrastructure
