REACT FUNDAMENTALS 1.0
1.1 Create-react-app
1.2 Basics of JSX
1.3 Concept of component in react.
1.4 Difference between a component and an element.
1.5 How to render an element/component conditionally.
1.6 Function and Class components.
1.7 How to display a list of elements and components.
1.8 How to think in terms of components.
REACT FUNDAMENTALS 2.0:
PROPS & STATE
2.1 Understand the concept of props in react (props, default props, prop types)
2.2 Understand the concept of state in react.
2.3 Difference between Props and State.
