10 websites you didn't know you were missing (until now) :

<https://t.co/vC0nCFDmk0>

People are visual learners.

Easily turn your data into stunning charts, maps, and interactive stories.

Upload a spreadsheet, and return with:

- Animated bar charts
- Survey data
- Scatter plots
- Story maps & more

The screenshot shows the Flourish website interface. At the top, there are navigation links for Features, Examples, Pricing, Sign up, ABOUT, BLOG, CAREERS, RESOURCES, and SIGN IN. Below the navigation is a grid of six interactive chart examples: Bar chart race, Covid data browser, Survey data, Magic charts, Zoomable hierarchies, and Story maps. A 'Make your own' button is visible below the first example.

The main content area displays a 'Urban population by country' bar chart race for the year 1992. The chart is colored by continent: Asia (blue), Europe (green), Africa (orange), Oceania (purple), and Americas (red). The total population is 2,414,602,589. The chart shows the following data:

Country	Population
China	338,332,766
India	239,904,557
USA	197,650,514
Brazil	118,712,912
Russia	109,027,120
Japan	96,691,094
Mexico	65,250,960
Indonesia	63,530,074
Germany	59,486,807
UK	45,108,693

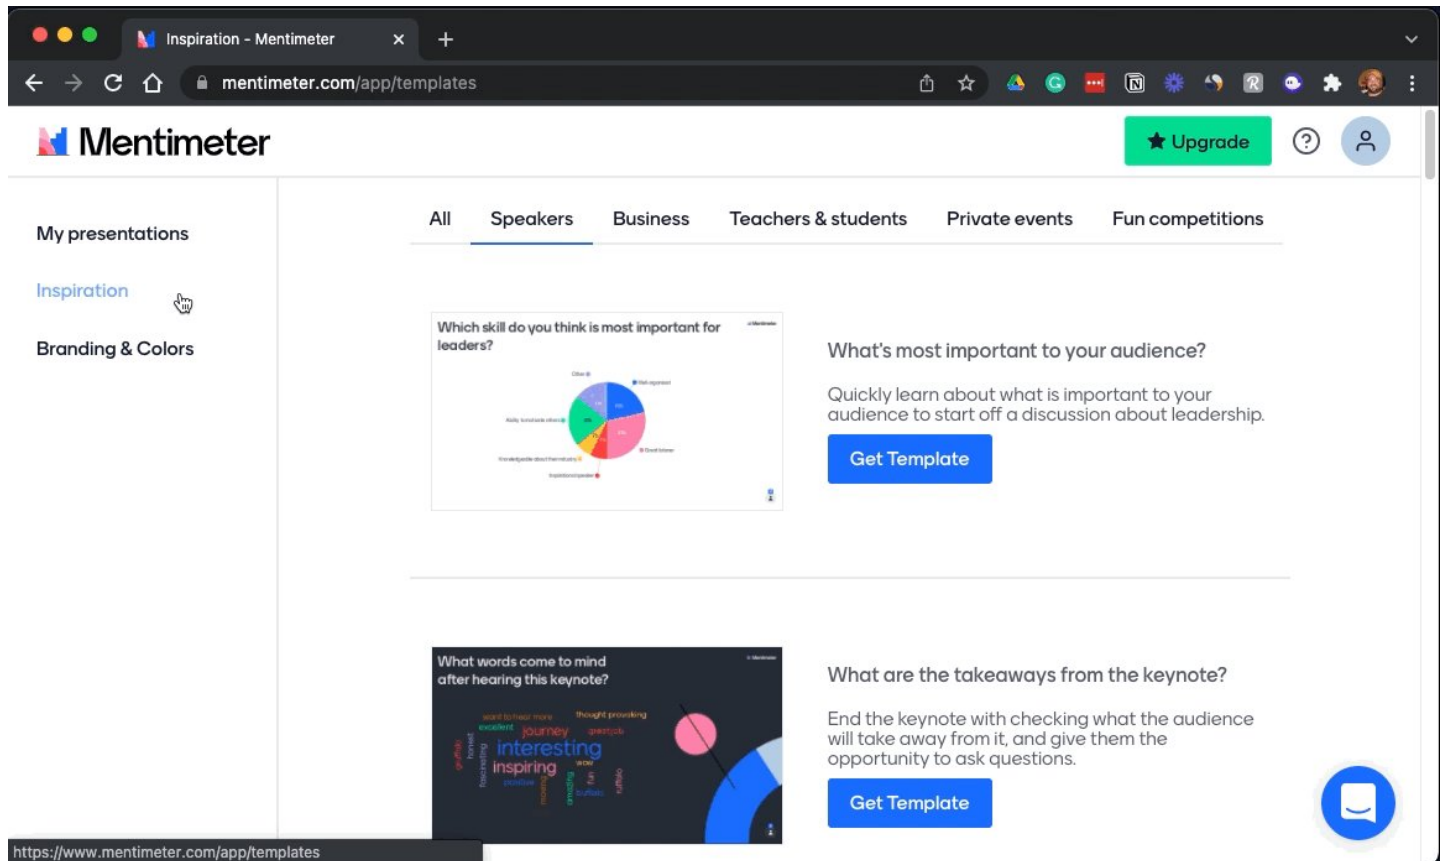

Below the bar chart is a timeline showing the population growth from 1962 to 2016. A play button is visible on the left side of the timeline, and a search icon is on the right. At the bottom of the page, there is a cookie consent message: 'We set cookies to make the site better. Learn more Accept'.

Looking for a way to make your presentations more engaging?

Build interactive polls, quizzes, and more allowing your audience to engage in real-time.

Using their smartphone, attendees can answer questions and the results are visualized as they happen.

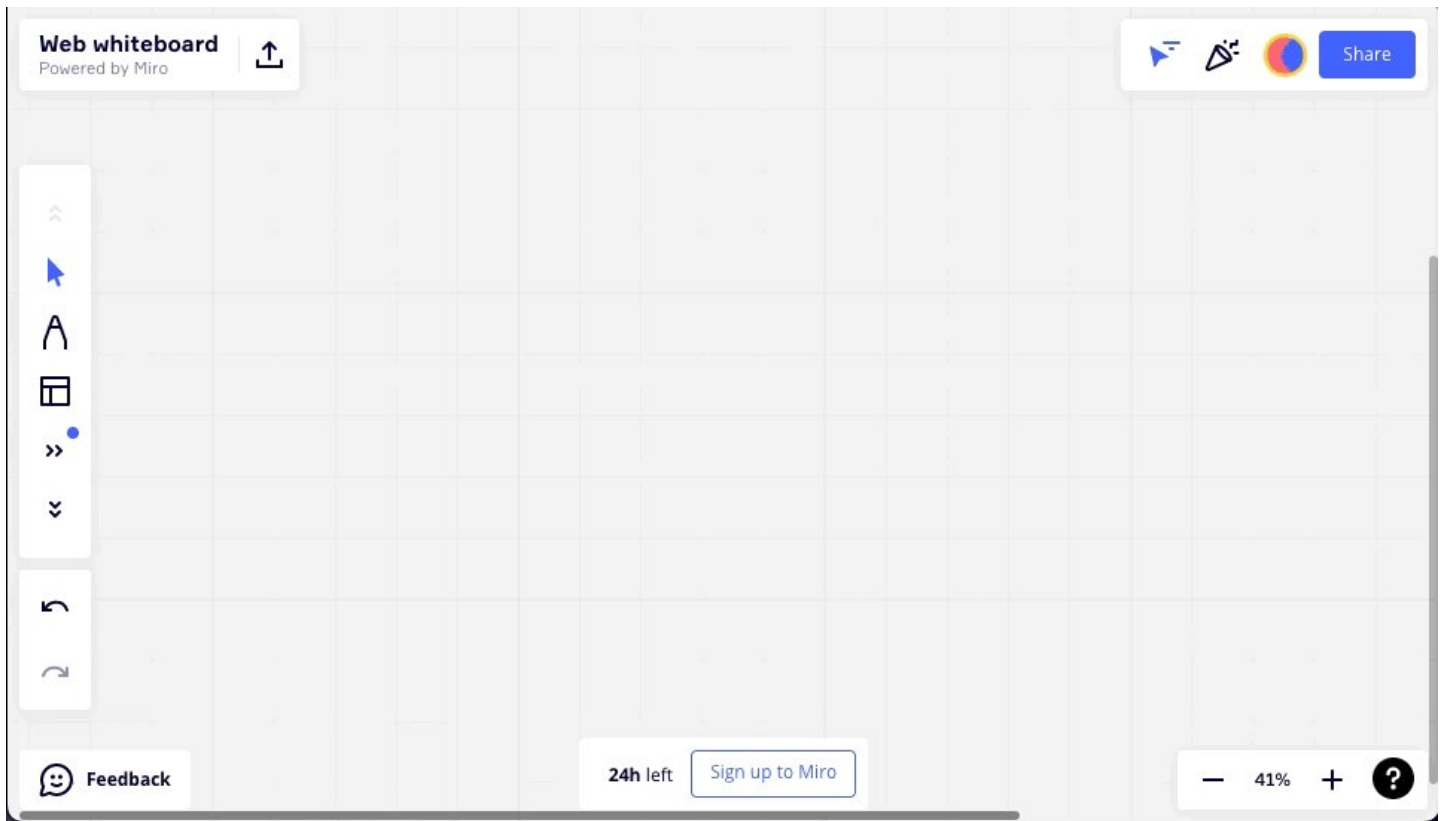

<https://t.co/wsUNfyHzFb>

An online collaborative whiteboard ideal for remote meetings, brainstorming, and ideation across teams.

- Make flowcharts
- Build product roadmaps
- Engage in a quick retrospective

The best part?

It's free.

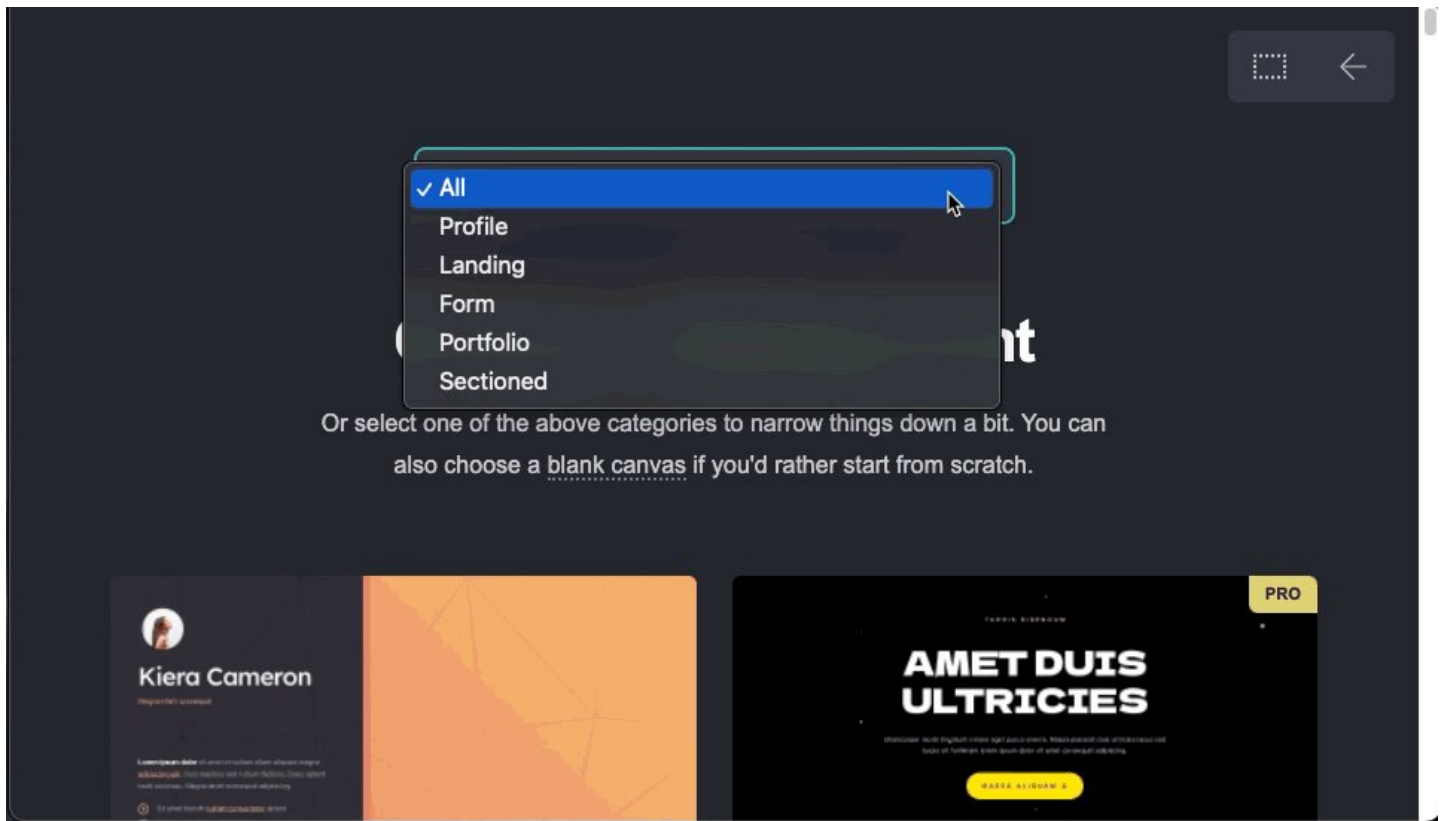

<https://t.co/RxDEsvPB2w>

My friend [@thejustinwelsh](#) brought this site to my attention recently.

If you're in the solopreneur game and need to spin up a quick landing page or website for just about anything, Carrd is tough to beat.

Simple, free, mobile responsive.

Check 'em out.

<https://t.co/PUIPxjeyi>

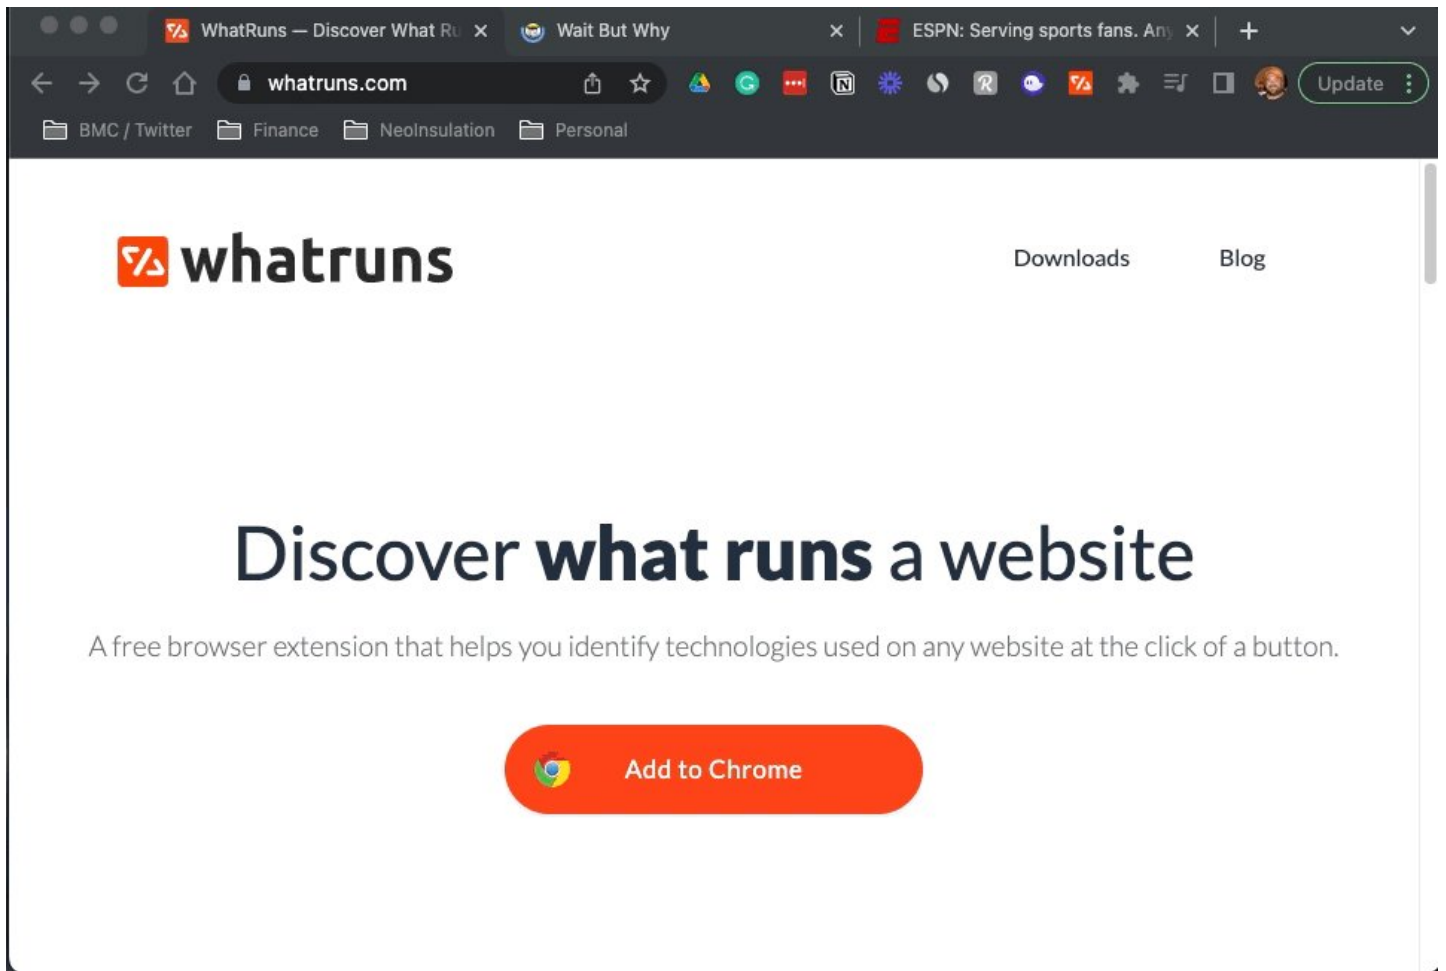

Here's one for the nerds (like me).

Ever wondered what tech stack is running that cool website you're viewing?

With 'whatruns' it's easy.

Once you have the Chrome extension installed, just click the icon & see everything behind the scenes.

Like this:

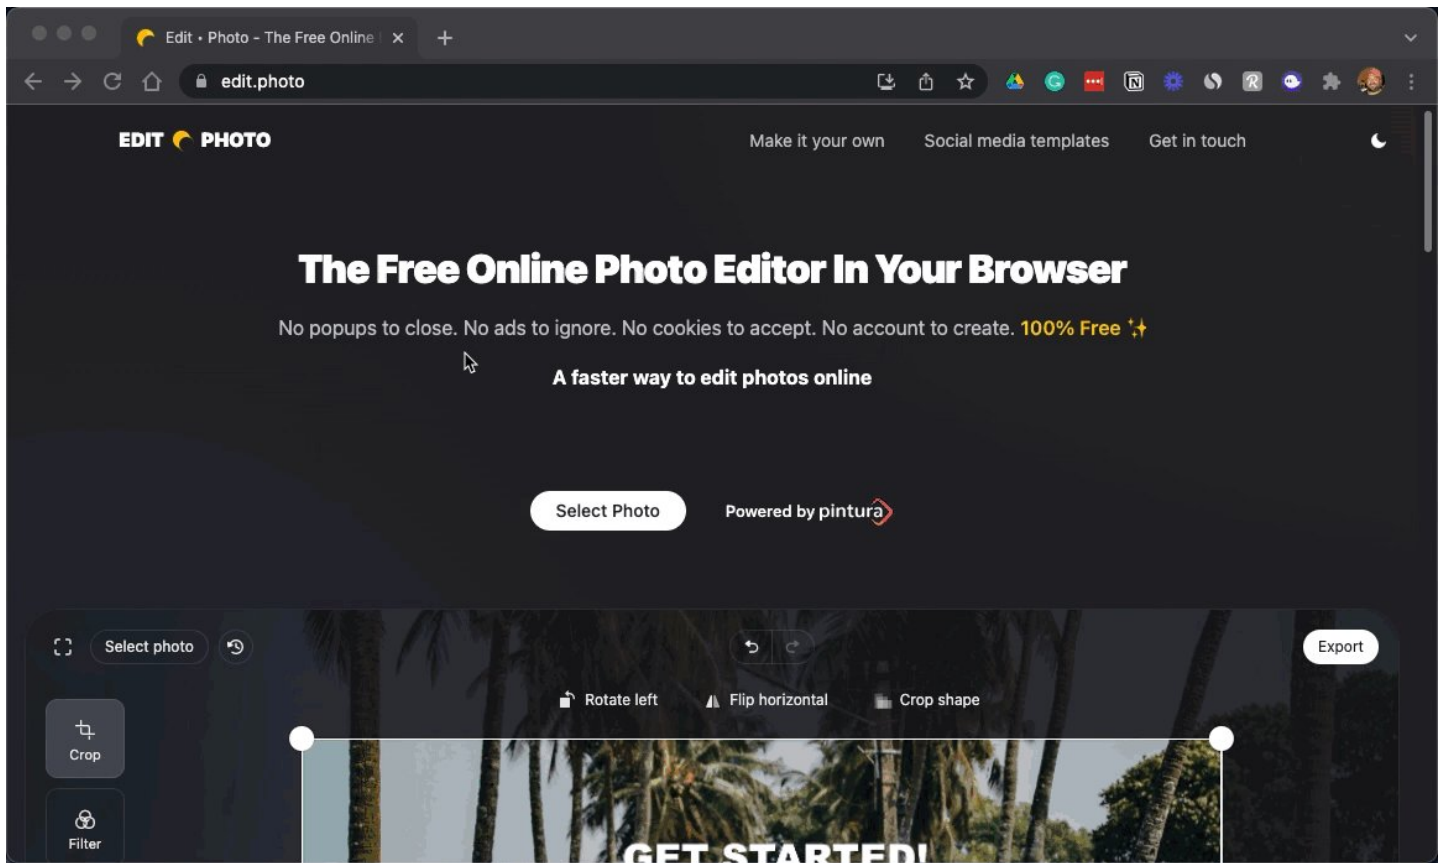

<https://t.co/s9sbOvDGdy>

A free and open-source graph drawing software developed in HTML5 and JavaScript.

Its interface can be used to create diagrams such as flowcharts, wireframes, UML diagrams, and organizational charts.

No login to create and no account required.

<https://t.co/MCtLVhp2Uw>

There's no denying that mental models, frameworks, and tools to help you make better decisions are super popular.

With untools, you get a categorized list:

- Mental models
- Instructions on how they're used
- Examples you can put into practice.

Tools for better thinking

Collection of thinking tools and frameworks to help you solve problems, make decisions and understand systems.

Millions of books: Available for free.

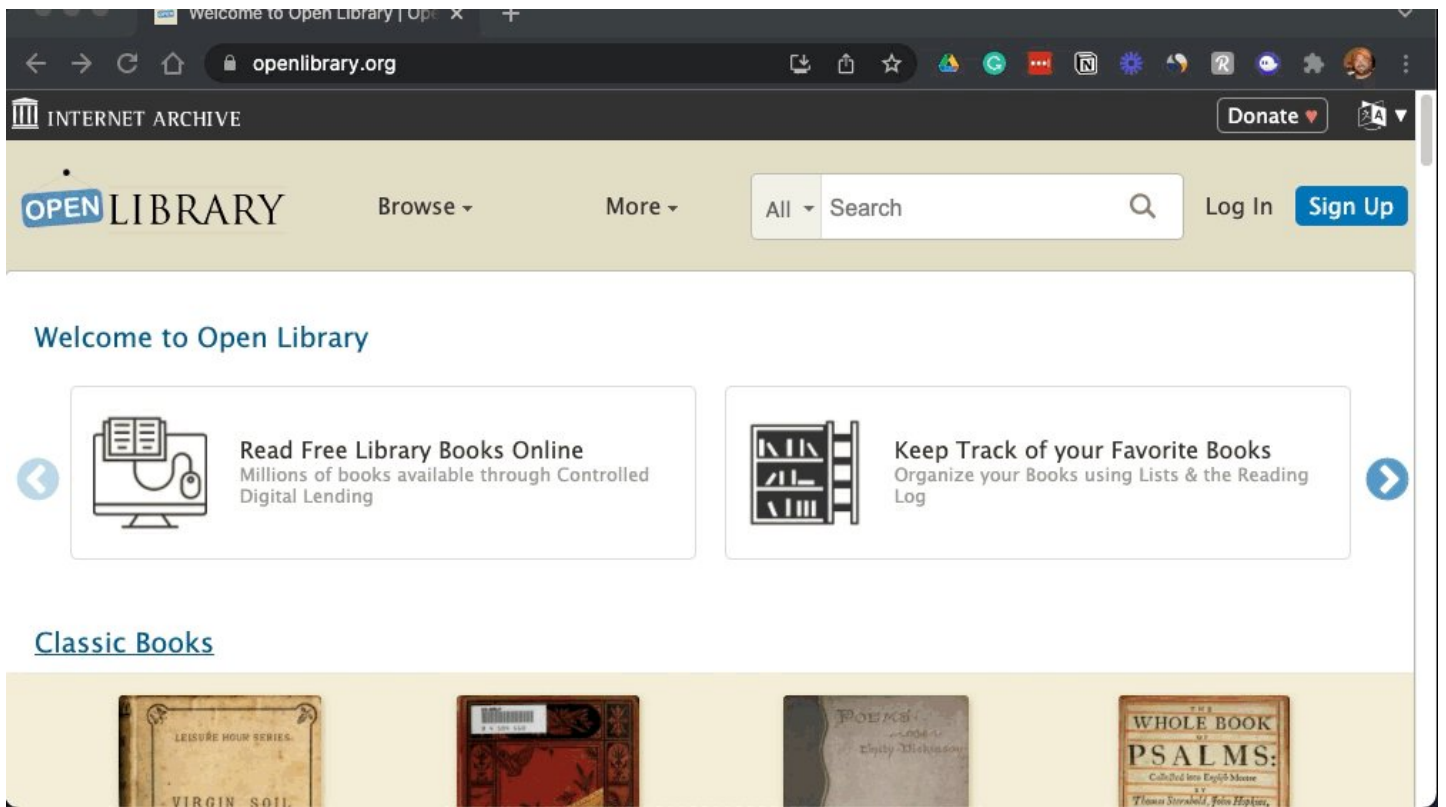

Booklists seem to be all the rage recently on Twitter.

(I'm guilty of posting a couple myself)

Instead of a list, here's a link to a library full of them.

The goal:

"A web page for every book ever published."

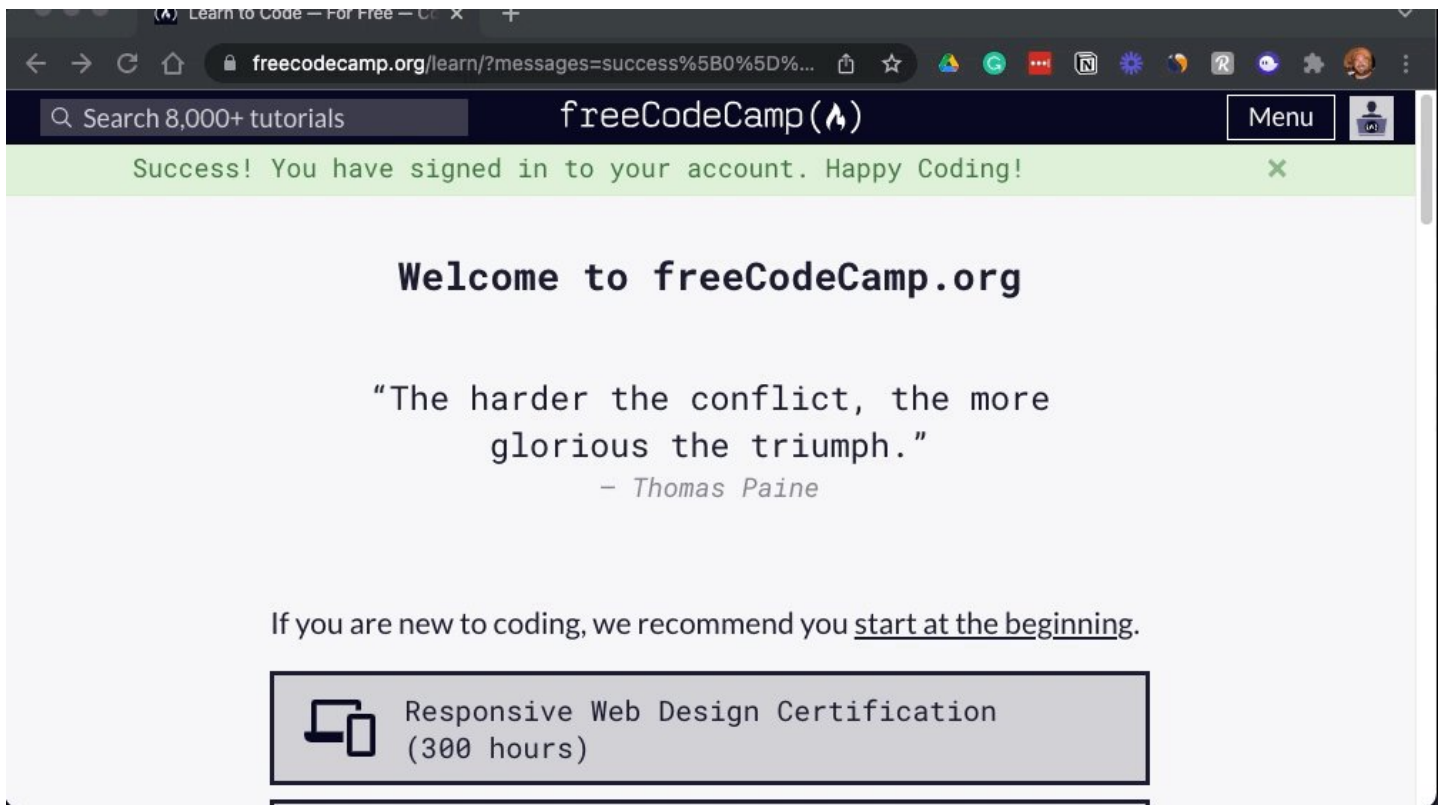

<https://t.co/mOFGsJ1NxF>

Learn to code for free:

It's never too late to learn a new skill & I think it's safe to say, computers aren't going away anytime soon.

HTML, CSS, Python & more.

They also have an awesome YouTube channel with 1,000's of hours of instructional videos.
