This is what they are doing to indigenous people in name of protection of biodiversity through false science they fund as @StephenCorrySvl of @Survival organization to protect indigenous peoples rights explains.
You can see how media inc BBC involved in this racist

WWF's propaganda for the land grab

WWF has today released a report, "Living Planet", which it claims, "reveals two-thirds decline in wildlife populations on average since 1970." In fact, it doesn't reveal anything of the sort. It's drawn from monitoring just 4,400 species – that's one-twentieth of one per cent of all species. They are the ones which have been monitored for 50 years, presumably because they were thought to be threatened anyway (or why bother counting them). So, the report effectively tells us that declining species are declining! It certainly doesn't say what the headline wants you to think: That wildlife populations are one-third of what they were in 1970.

But however you crunch the numbers, everyone knows that some species *are* in decline, so let's turn to where WWF allocates blame. As usual, it's supposedly the fault of humanity as a whole. We're all guilty! Wrong again.

It's not true – not everyone is. Much of the world's population bears little or no responsibility for any decline in wildlife. The real blame must be laid at the door of the top one per cent of those in Global North with their gluttony of overconsumption. Of course, they're also the key culprits in the crime of imposing poverty on the Global South.

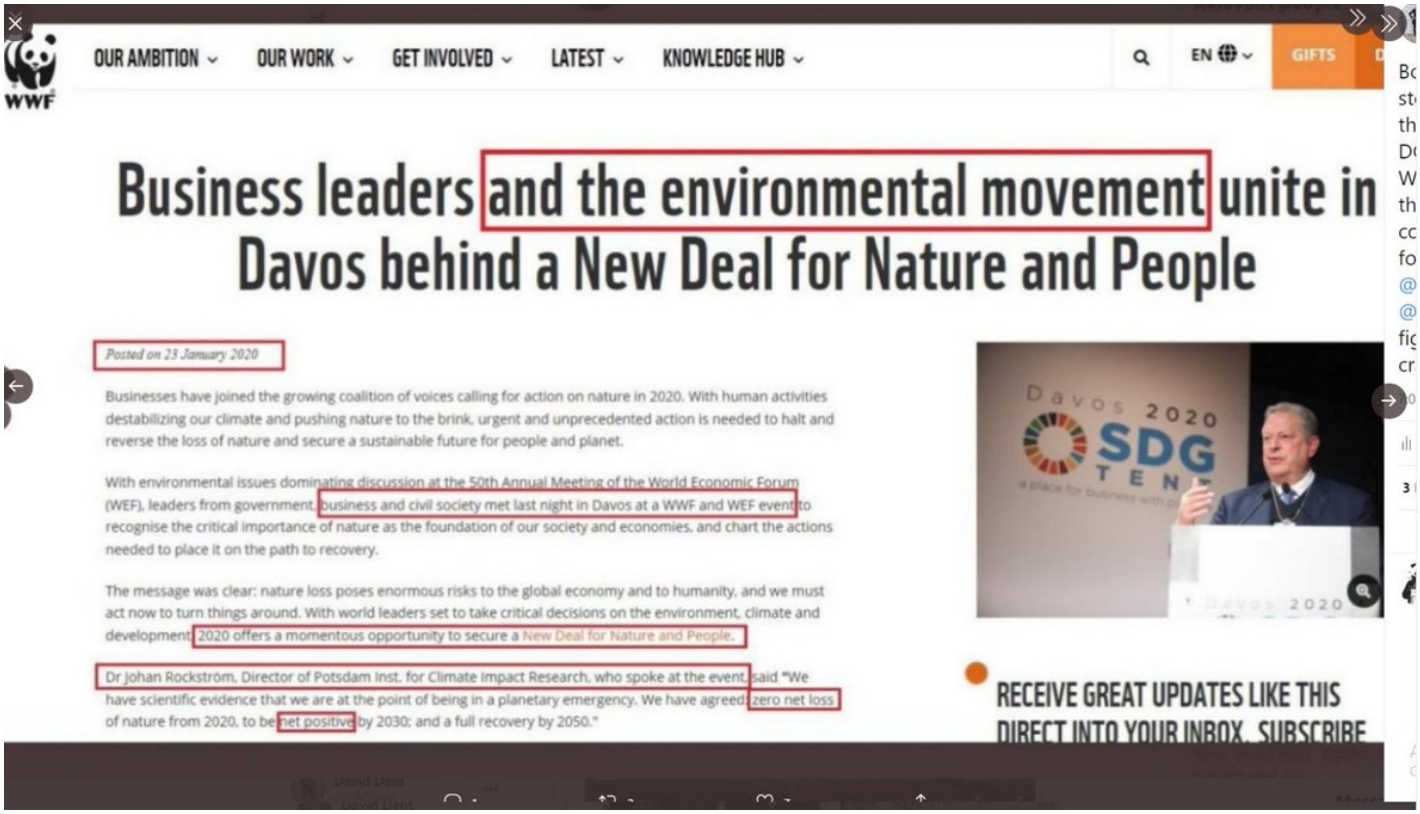

The rush to exploit the world's "natural" areas for resources needed by "civilization" is the real driver of wildlife decline, and that means those one per cent. The report doesn't mention how millions of people – especially indigenous ones – live largely self-sufficient lifestyles – subsistence hunting, herding or growing their own food, or that many of these people do a far better job at protecting biodiversity than "civilization's" conservation industry does. Needless to say, there's no mention of how that same industry has been attacking them and destroying their self-sufficiency for generations. In fact the report makes it clear that dietary habits and food production have to change. It doesn't explain how, but the attack on hunted meat – particularly by Africans – is now one of the accepted tenets of "conservation."

WWF plays to its audience of people in thrall to the northern European belief that "Nature" is separate from humankind. It wants 30 per cent of the globe put into "Protected Areas," which will be the biggest land grab in human history. Bearing in mind that such places have a poor record now (many of the most rapidly shrinking species are inside them), one is left with the question of whether this is really about anything more than funnelling yet more public funds to WWF and its allies.

In any event, its report today is really all about bringing people around to the idea of doubling "Protected Areas" which will be such a disaster for people and planet.

imperialist elitist agenda , linked to notion uber rich white urban people, (often representing Multinational corporations whose profits result from unprecendeted eco damage) better guardians of nature than those who have stewarded the land well re biodiversity for centuries

Idea of unelected elites- Corporations 'experts' & State, planning economy, land, resources & human 'wellbeing' (Swastika means just that) has another name it has been tried before, and had that 'GREEN' saviour complex at heart of it: was called FASCISM

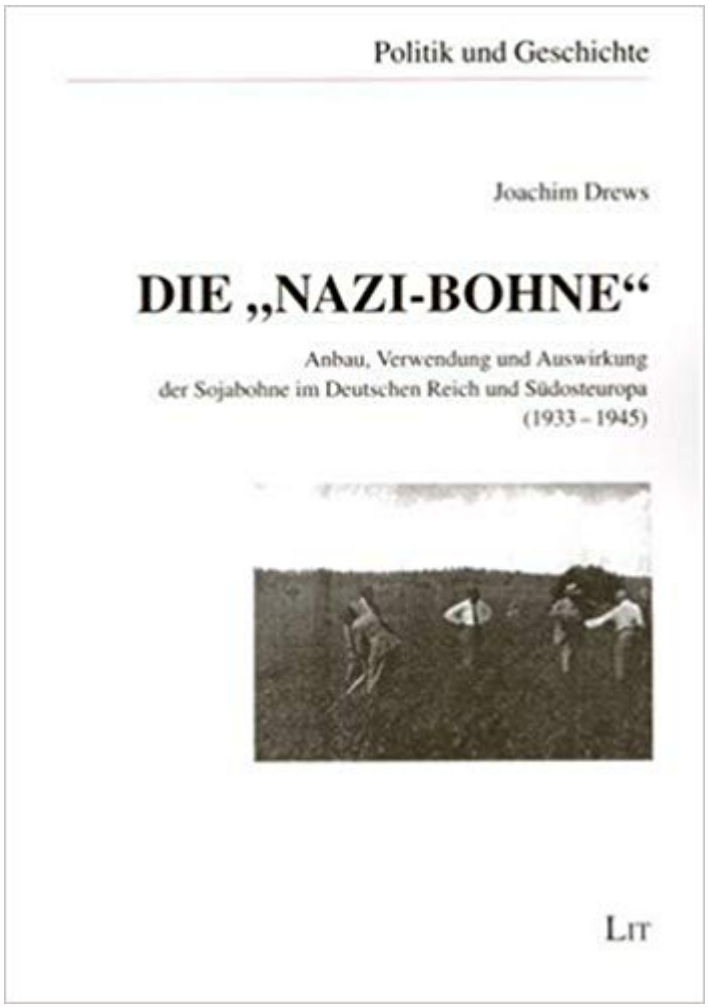

https://t.co/xiotlkxGrO

Despite obsession moral sanctimony, obsession altrusitic notions 'enlightenment' of Eastern mysticism, animal rights, ideas 'transhumanist' future of human race, concern about 'population', manifested as most evil period of human history, & corrupt science & doctors helped it

As did Big Public Health & ideas about diet, wellbeing, strength through joy (you will own nothing & VILL be happy) & eliminating things corrupting to body & spirit of human health. We would return to stroll in mythical primal forest (in smaller numbers while the existing

inhabitants would be gehtto-ized but their needs catered for by the caring overlord state in sustainable self sufficient communities , and them given dignified work for the cause.
This is all part of the same mentality now, they have just hoodwinked you that they are the

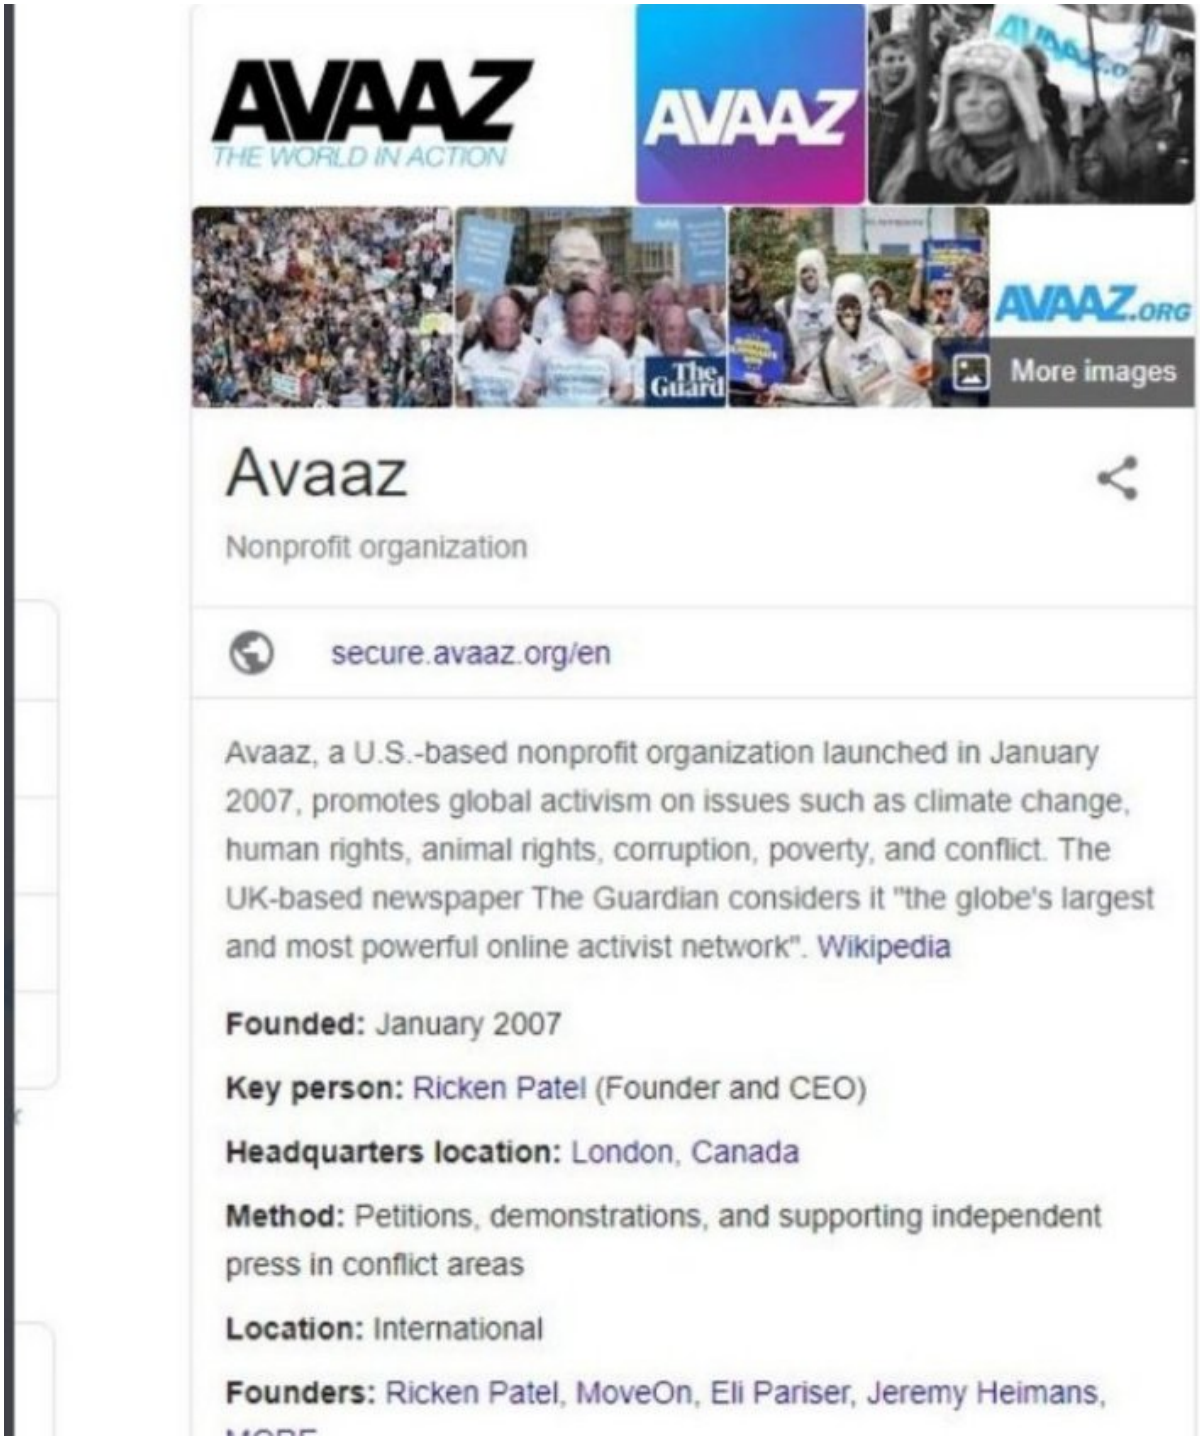

antithesis of racism & all about human dignity, opposed to destructive nationalism. But Nazis were never nationalist in the sense of insular nationalism: they always about expansionism & domination of the world. This is Fascism rebooted on a global scale https://t.co/T3OoP3TwIV

This current Manifestation of Corporatist governance is Global in scale, elite CEOs uber wealthy investors banking systems & their lackey NGOS, academics, government puppets, and World governance orgs such as UN & WHO. But its still profoundly anti democratic, and committed to

destroying national democracies, & controlling everything for 'greater good'. Dissent & gulags for opposition to it. land grabs down line if we don't challenge it now, & national democracies are best way: we need to elect those who will stand up to them https://t.co/Xvpq9wSt5i

No matter how much they sneer at & attempt vilification of 'populism', it is the voice of dissent by masses against elite authoritarians. The elite has managed to completely fund control & geld the liberal left & make boogiemans while they have gone about building global fascism.

Their tactic has been to appeal to the very worst of the middle class liberal, who considers themselves 'woke' and enlightened, and essentially an intellectual snob. Challenges to their mickey mouse science are met with snobbery, & creation of strawmen & ad hominem; despite often

being blatantly corrupted by false accountancy driven by spiritual 'beliefs' Adventism Ripple (MIckey Mouse Warning to Humanity letter) & Harwatt Loma LInda Uni connected); Springmann, & Poore etc vegans , Communists, or by WEF corporate interests funding it. The money involved

Do NOT be afraid to challenge them and do not let them gaslight you by building strawmen that you are a 'science denier': it is THEM that are corrupting the integrity of the scientific method. Take for eg the All cause deaths from Covid 19. They are ALL comparing the deaths to

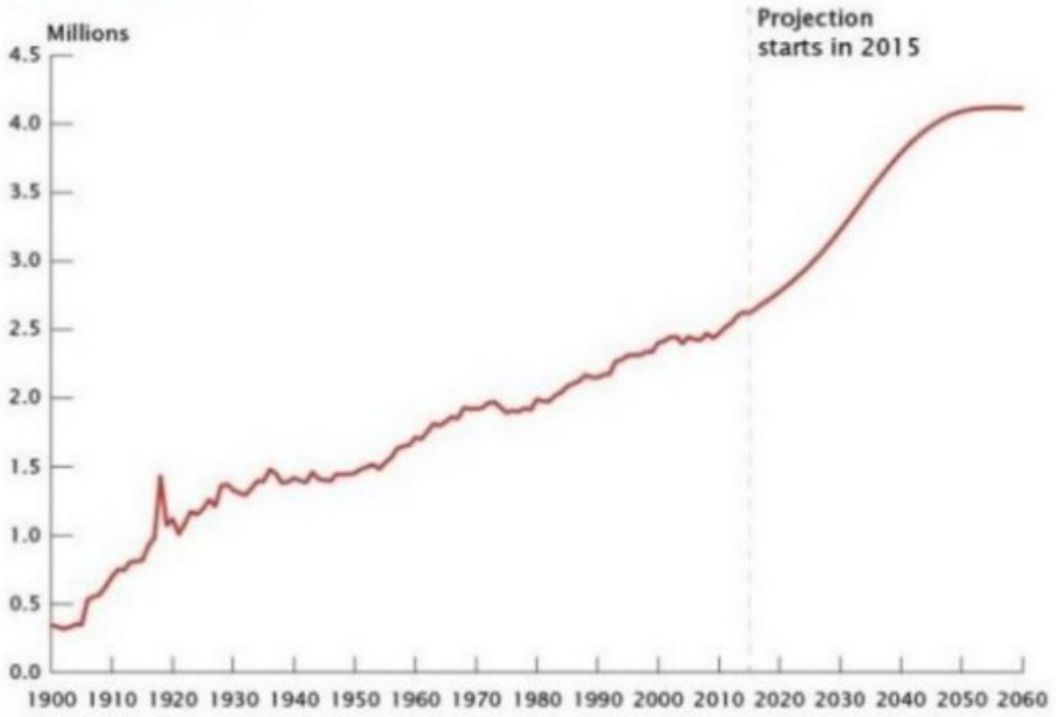

previous 5, 10 yr averages etc. THEY are not stupid, they think you are. They can't do that, because we are on a STEEP uphill trajectory of expected deaths because of baby boomers post 1945 reaching their mid 70s & dying en masse anyway. All cause deaths will NOT be out of line

too much to what was expected if you take this in to account, yet we see abuse to those questioning that etc ,appeal to authority & denial of what patently obviously a stitch up to exaggerate its impact. Unfortunately aging increase likelihood of death & those boomers are legion

The nation as a whole is aging, but not every area of the country or every racia and ethnic group is graying at the same rate. Yet, in some areas, mortality is having a surprisingly substantial impact on the remaining population. As part o our mid-decade research plan, we take a look at trends in our 2015 series of population estimates.

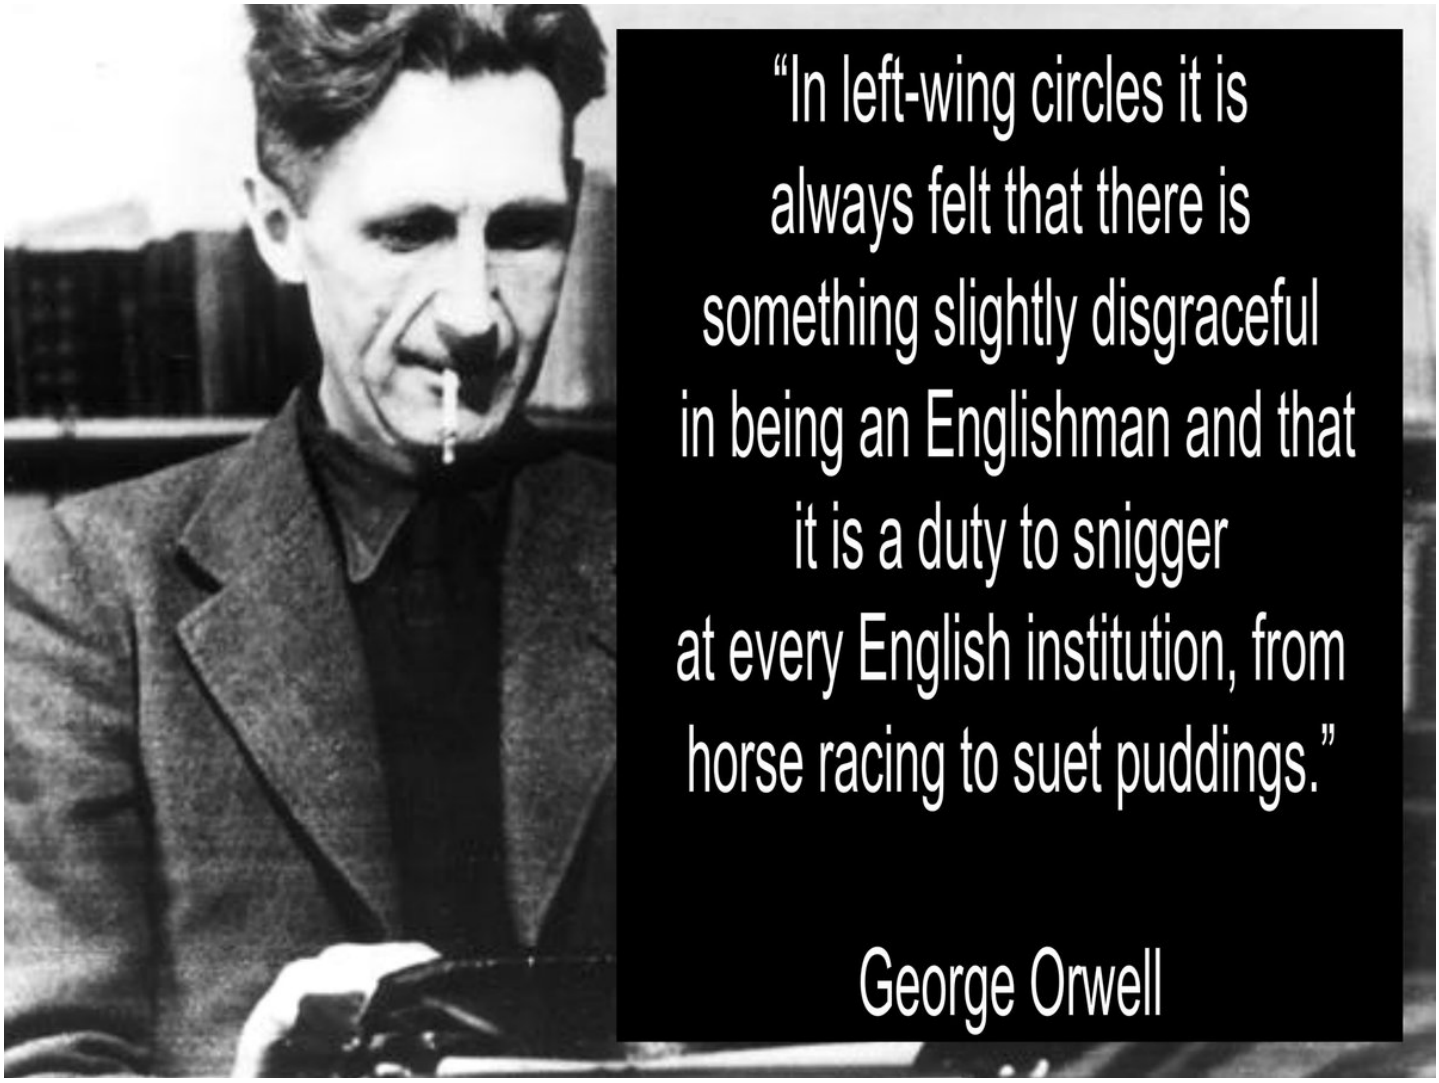

Deaths by Year

Note: The bump in 1918 is attributable to the influenza pandemic.
Source: Centers for Disease Control and Prevention, National Center for Health Statistics (1900-2014) and U.S. Census Bureau, 2014 National Population Projections (2015-2060).

While the U.S. population as a whole is not expected to experience natural decrease (fewer births than deaths), two states (West Virginia and Maine) and almost a third of counties experienced this demographic threshold in 2015. In

But abuse & contempt they have for common man also extends for eg in to insults re Brexit voters, & also anything middle class elitists sees as British (or equivalent in any other nation eg Morrocan intellectuals re the souk & snake charmer, American intellectual cowboy &

the hamburger etc). Orwell had them sussed totally. A class of virtue signalling elitist authoritarian busybodies who will support 2+2=5 if it puts the common person down, and dedicate much of their lives (and paid to) to controlling us & destroying our cultures. So ultimately,

it is THEY who become racists in their utter contempt for myriad cultures of world, & imposing their urban bourgeois moral absolutism on everyone else. Here- hard to tell if Woke vegan or far right racist isn't it? That's because they ARE THE SAME THING https://t.co/VHK9gPReyc

But of course, the CORPORATE elite want you to give up eating and wearing animals too. Very people who have done most to destroy the environment claiming this will save the planet, while they carry on raping it. Look at these WEF rogues gallery mobsters who back EATLancet , note

their engagement of belief when it suits to challenge scientific expertise @fleroy1974 when it suits not with reason & evidence but morality & accusation of 'industry funding' when £Billions corporate dosh engaged in funding science & UN, weird NGOS & half wit celebs roped in,

media control etc. Look for eg at the mob behind the Guardian's zest for promoting their ecofascism via Monbiot, and attacking animal ag whenever they can. Bought and paid for by elite philanthropy to push their agendas https://t.co/78o2MHyEji

While you have elitist uber wealthy animal rights loons determined to impose the moral authoritarianism on the rest of humanity & destroy livestock farming in there, to others like Gates, its always just about money and control, and like his father a eugenicist, convinced its the

masses that are the problem and has committed to helping reduce the burden of their breeding and consumption. This, a man whose home living alone produces this kind of eco footptint https://t.co/hPs4V1Xve3

So how is Mr Gates involvement in agriculture for his 'green' revolution going? Helping Black Lives is it? So once again, back to them carving up Africa for their own ends. These WEF people EVIL, & I'm getting sick of liberal left pandering to & defending that uber weathy elite

Gates Foundation's Failing 'Green Revolution' in Africa: New Report

New research from the Tufts Global Development and Environment Institute finds the billion-dollar Alliance for a Green Revolution in Africa is not living up to its promises

A longer version of this article ran August 14 in The Ecologist

By Stacy Malkan

Massive investments spent promoting and subsidizing commercial seeds and agrichemicals across Africa have failed to fulfill their purpose of alleviating hunger and lifting small-scale farmers out of poverty, according to a new white paper published by the Tufts University Global Development and Environment Institute. A report based largely on the research, "False Promises," was published July 10 by African and German nonprofits that are calling for a shift in support to agroecological farming practices.

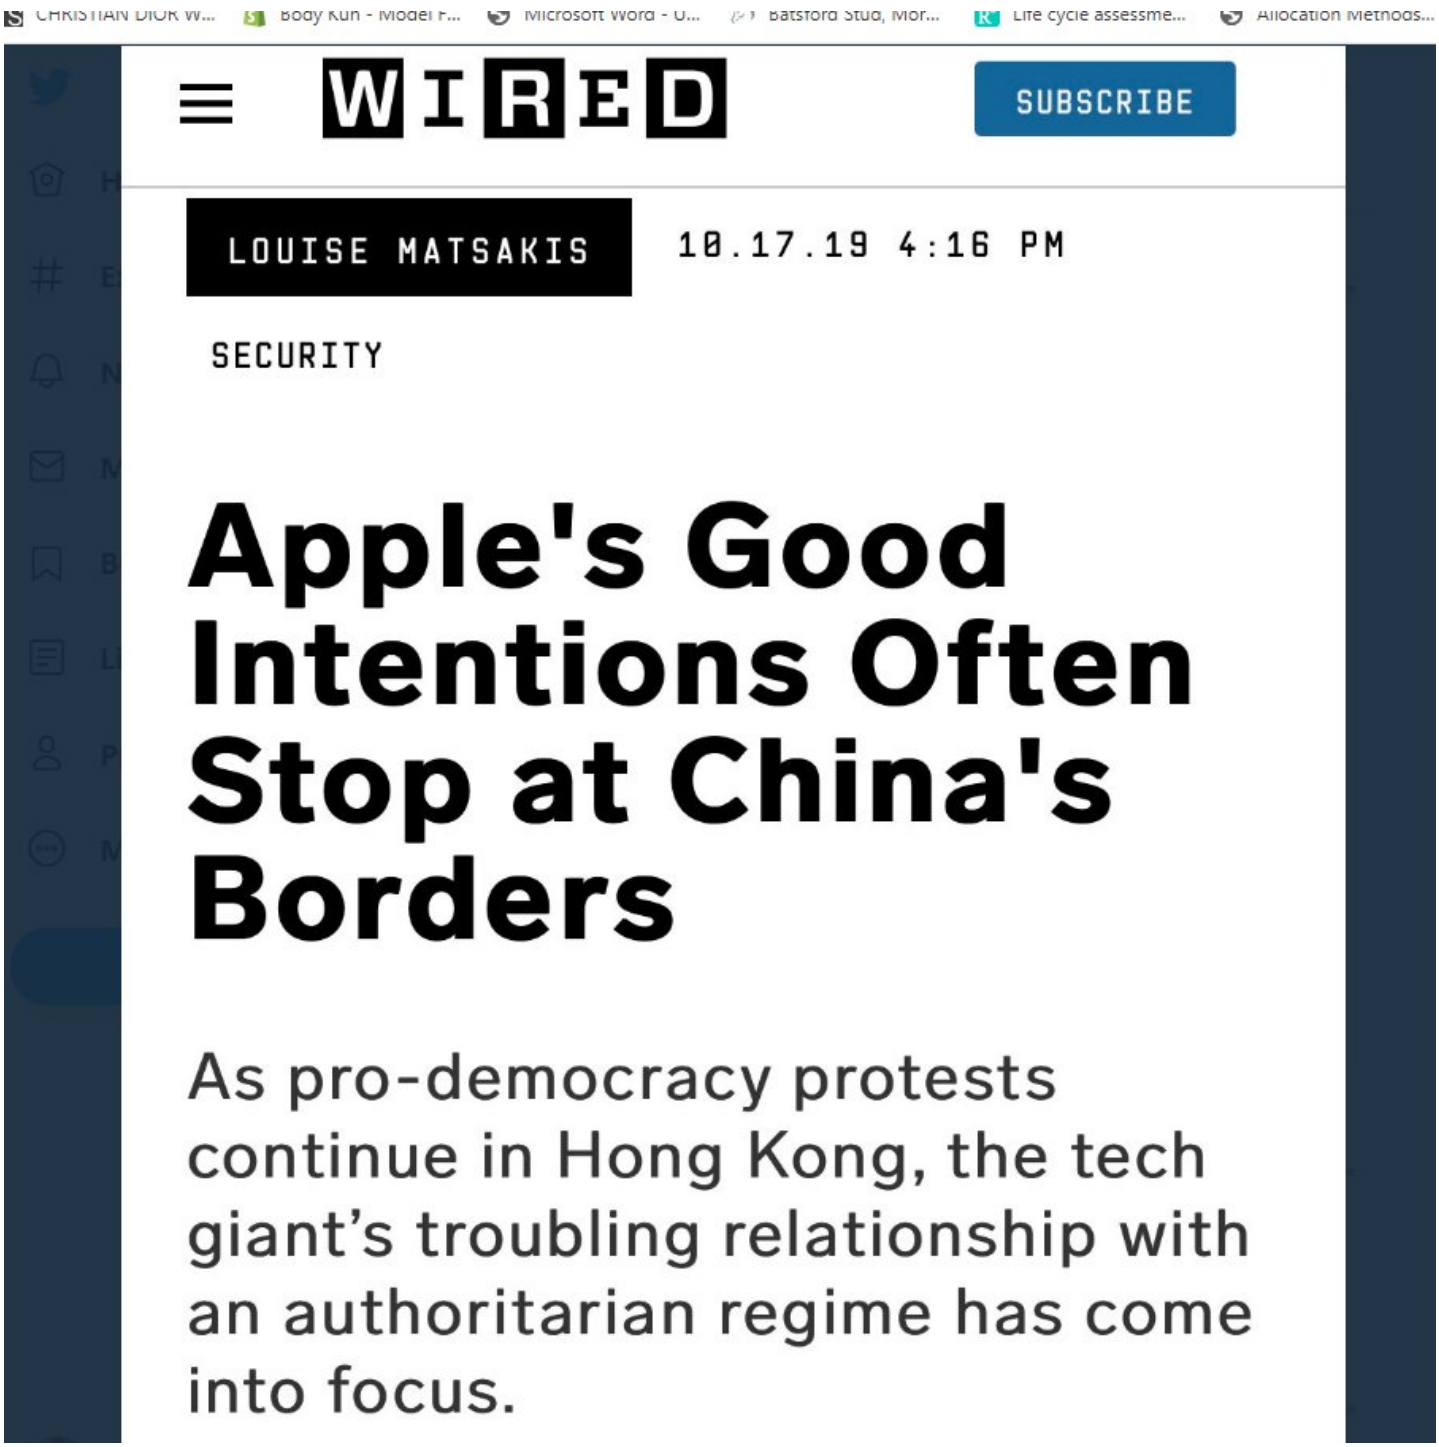

The research led by Timothy A. Wise examines the Alliance for a Green Revolution in Africa (AGRA), an international nonprofit launched by the Bill & Melinda Gates and Rockefeller foundations in 2006 with promises to double yields and incomes for 30 million farming households while cutting food insecurity in half in 20 African countries by 2020.

In pursuit of that vision, AGRA has collected nearly $1 billion in donations and disbursed $524 million, primarily in 13 African countries, on programs promoting the use of commercial seeds, chemical fertilizers and pesticides. This "Green Revolution" technology package is further supported by subsidies; Wise reports that African national governments have spent roughly $1 billion per year in the target countries subsidizing the purchase of seeds and agrichemicals.

Despite the public support, AGRA has provided no comprehensive evaluation or reporting on its impacts. The Tufts researchers relied on national-level data for agricultural productivity, poverty, hunger and malnutrition to assess progress.

"We find little evidence of widespread progress on any of AGRA's goals, which is striking given the high levels of government subsidies for technology adoption," the researchers report. The paper documents

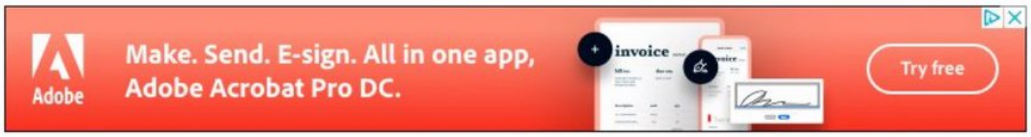

whose economic model IS Corporatism aka Fascism, & actually they are racist imperialists to core & profit from global slavery. But of course elite give that liberal green left so many NGO , academic, UN etc jobs & self importance, plus all the tech jobs & promise more & a green

revolution for jobsworths who'll check on every aspect of your life even preparing carbon credit tax for bog roll you use. Meanwhile robots & Chinese & developing world slavery will produce everything. Plant based diets my ass. Slavery always about crops livestock always=autonomy

"Right after the Civil War, being a cowboy was one of the few jobs open to men of color who wanted to not serve as elevator operators or delivery boys or other similar occupations," says William Loren Katz, a scholar of African-American history and the author of 40 books on the topic, including *The Black West*.

Freed blacks skilled in herding cattle found themselves in even greater demand when ranchers began selling their livestock in northern states, where beef was nearly ten times more valuable than it was in cattle-inundated Texas. The lack of significant railroads in the state meant that enormous herds of cattle needed to be physically moved to shipping points in Kansas, Colorado and Missouri. Rounding up herds on horseback, cowboys traversed unforgiving trails fraught with harsh environmental conditions and attacks from Native Americans defending their lands.

African-American cowboys faced discrimination in the towns they passed through—they were barred from eating at certain restaurants or staying in certain hotels, for example—but within their crews, they found respect and a level of equality unknown to other African-Americans of the era.

Judge for yourself which is problem to environment & sustainability too, & which best to sustain people with autonomy from these monstrous Corporate greenwashing themselves at WEF, & their diabolical attempt to seize land and resources from farmers & indigenous people to control

even our food. To create justification for the shift to control all, they engineer various global crisis that requires fear for consent to transition to corporatist global management, their 'science' is NOT scientific devoid of nuanced solutions, traditional knowledge & success,

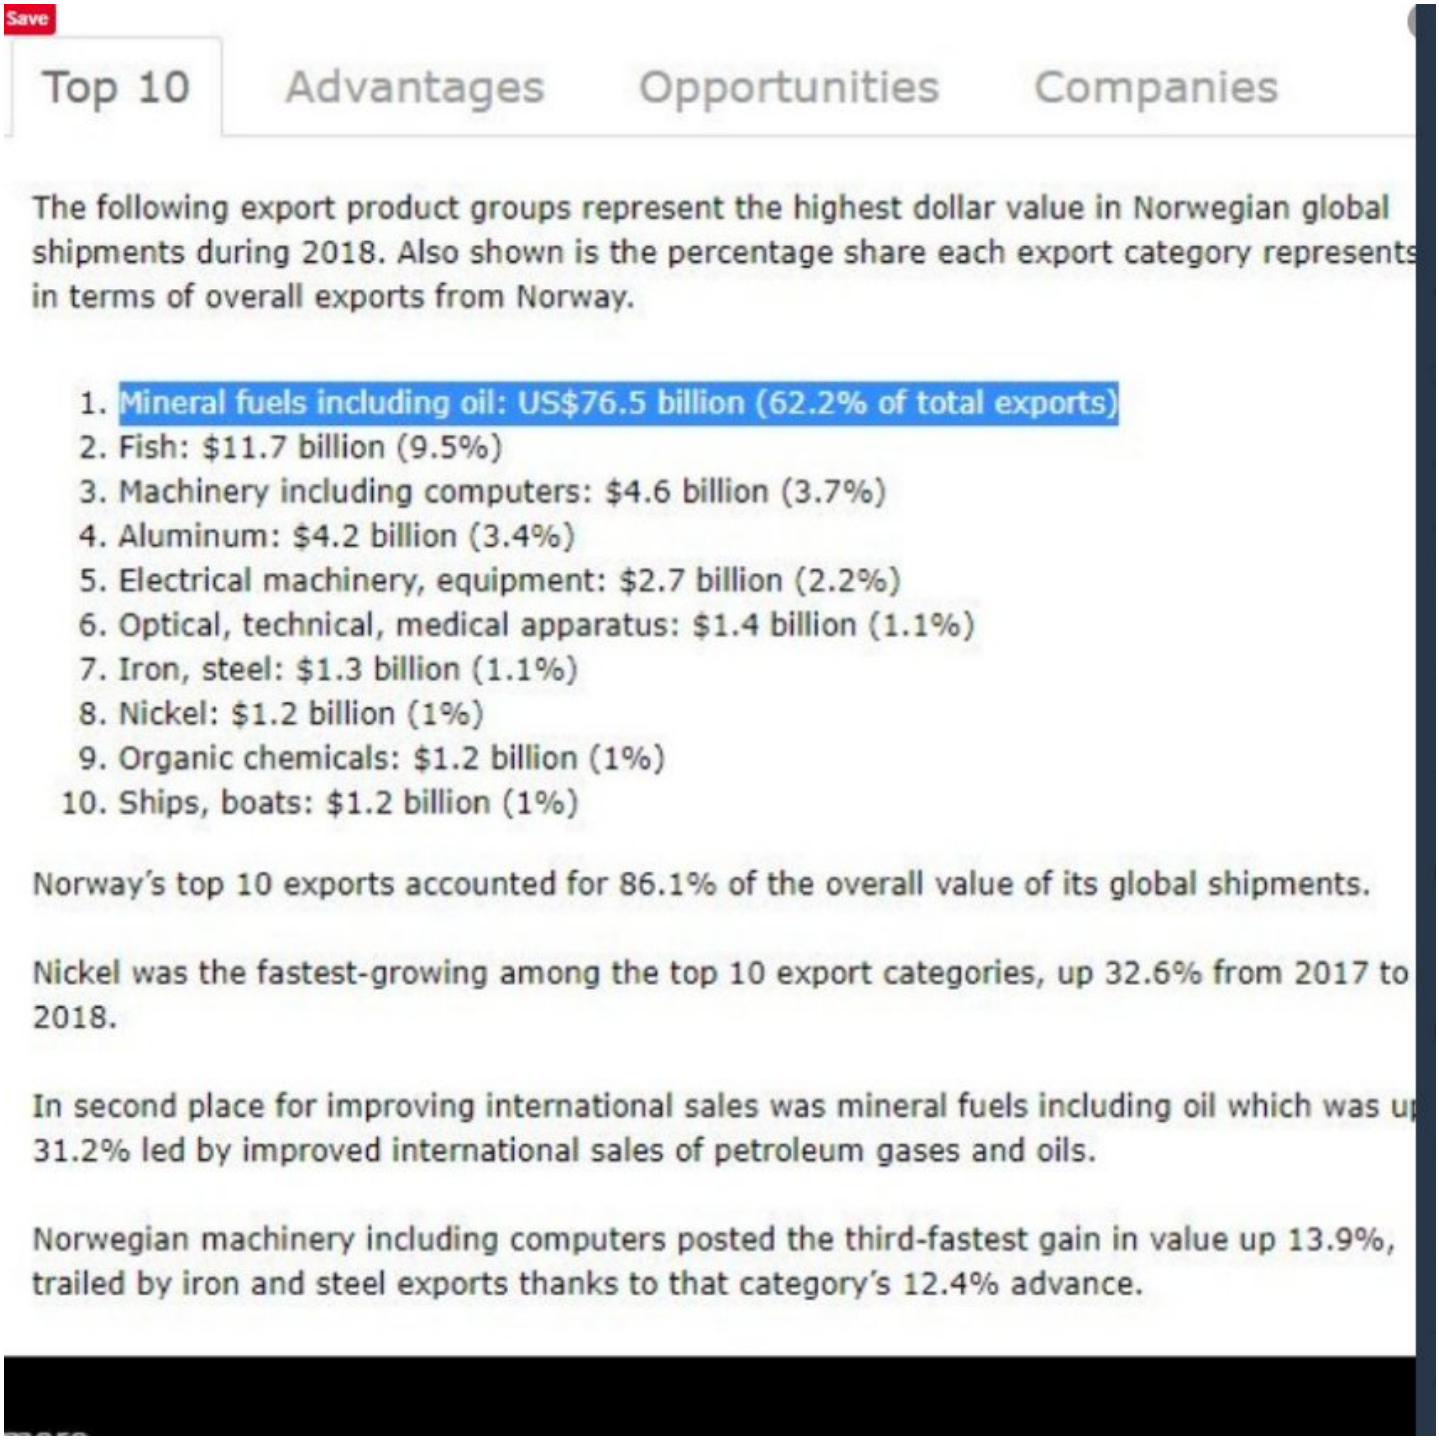

& fact actual food security is best provided by livestock not corporate food so often used to blackmail (remember UN Oil for food scandal, agricultural trade blockades eg on Serbia -agricultural powerhouse where cherry orchards went to rot) control & corrupt shits like YARA &

their UN mate Erik Solheim who had to resign in disgrace, both of them of course buddies with Stordalen of EATLAncet architect of the global solution to the fear of shortages they engineered with diabolical pseudoscience funded by Wellcome, another WEF bunch of shits and along

with the Norwegian government massively invested in fossil fuels . Getting it yet? Diversion doublethink and protecting their own arses by demonizing livestock agriculture, with Wellcome & YARA massively invested also in global corporate crops agriculture.

It's Orwellian, actually very transparent, and so farcical it may as well be an episode of a dystopian future from the Twilight Zone.
BUT it doesn't stop there! The 'sustainability' goals, are the exact OPPOSITE of sustainability, so more Orwellian doublethink. If IKEA & H&M are

about sustainability then I'm a Chinaman. Of course we all will be under their determination to turn us in to consumer drones and we'll end up all wearing the same shit they sell to us. We SHOULD be laughing at them but sadly it is too serious to https://t.co/Sgse2VQi5s

> Furniture made to last and has.

And so the same story with Nestle, & inbuilt obsoletion tech the polar opposite of durability that requires FAR less resources & we did perfectly well without shit like palm oil before when all was made from animal fat their corrupt scientists demonized https://t.co/0al2cTZF3p

> So then there's YARA, IKEA, H&M Nestle these are the eco rascals that have wrecked so much, all part of the WEF, and involved with plant based diet push and ecofascists WWF, greenwashing their filthy hands, and blaming meat. And more. Just look at this! GRANTHAM. An elitist who thinks Africa is 'overpopulated' , so clearly a racist too, funds the WWF and the Grantham Institute , a bunch of tree hugging academics which is handy because his business is felling them for WOOD ! Yeah no kidding! ■

And trees of course, may actually not be worthy of the cult like allegiance they have. Could be bad in some cases, esp without livestokc to manage them which has been long known can lead to forest fires getting out of control and chucking so much greenhouse gasses in to the

atmosphere and damaging existing eco systems for ancient mythical ones that will produce us no food or co produce or support cultural & economic autonomy. Again we are back to Nazi rewilding. Of course the WEF don't really care about any of that when do you think they suddenly

got ethics, these racist, eco vandals and profit motivated billionaires who had evaded tax through philanthropy to further their agendas? The tree planting is about CARBON credits. So the elite can galavant and pay for it by planting trees - ON LAND THEY DON'T OWN! And forcing

farmers to do it or starve, and feed us fake meat & plnat based diets with ridiculously underestimated low carbon cost & false health claims. Stay tuned as there's going to be revelations about all that before long as uncorrupted scientists are looking at the claims. Of course

I looked at this one and saw the kind of swindling they do, so you don't have to be a scientist to go through a paper to see the blatant shit they try to pull.

So we have existential threat to planet and humanity posed by climate change, because you know, all this snow we are having actually disappeared 15 yrs ago and we are imagining it - Biodiversity crisis, food security crisis, and human health re Covid etc, is all provided by

science and media funded by THEM. So of course crazy exaggeration is needed for fear for consent to this draconian authoritarian unelected shit. Meanwhile the globalists point their fingers at Trump ad tell you he's the racist fascist! Because he stood up to them. He may not

be the brightest spanner in the works but he is NOT part of the actual Fascist coup going down in front of your very eyes at global level, complete with all the racism I have described and give examples of here. But don't think conservatives will necessarily save you from it:many

of them eg Grantam ARE conservatives. They always like big money these Eton boys like Boris too; educated not for brilliance but because of their easily manipulated compliance - Princess Nut Nuts wrapped him round her little finger, & fellow Eton Rifles https://t.co/OfIU49mdjI

Sup up your beer and collect your fags
There's a row going on down near slough
Get out your mat and pray to the west
I'll get out mine and pray for myself
Thought you were smart when you took them on
But you didn't take a peep in their artillery room
All that rugby puts hairs on your chest
What chance have you got against a tie and a crest?

Hello-hooray, what a nice day, for the Eton rifles, Eton rifles
Hello-hooray, I hope rain stops play, with the Eton rifles, Eton rifles

Thought you were clever when you lit the fuse
Tore down the house of commons in your brand new shoes
Compose a revolutionary symphony
Then went to bed with a charming young thing

Hello-hooray, cheers then mate, its the Eton rifles, Eton rifles
Hello-hooray, an extremist scrape, with the Eton rifles, Eton rifles

What a catalyst you turned out to be
Loaded the guns then you run off home for your tea
Left me standing, like a guilty schoolboy

What a catalyst you turned out to be
Loaded the guns then you run off home for your tea
Left me standing, like a naughty schoolboy

We came out of it naturally the worst
Beaten and bloody and I was sick down my shirt
We were no match for their untamed wit
Though some of the lads said they'll be back next week

Hello-hooray, there's a price to pay, to the Eton rifles, Eton rifles
Hello-hooray, I'd prefer the plague, to the Eton rifles, Eton rifles

Hello-hooray, there's a price to pay, to the Eton rifles, Eton rifles
