@BillyBostickson

1. Great idea & it is all for a good cause, isn't it?
I predicted this in April and was the first to catch them doing it on Dec 2.
https://t.co/PMcICHQWUi
So, make sure to credit me in any article you write!
Taiwan News reported it on basis of my tweet as @keverington can confirm

In response to an article purportedly debunking Yan Li-meng's (閻麗夢) claims that the virus was made in a Chinese lab, Kristian G. Andersen, a professor in the Department of Immunology and Microbiology at the Scripps Research Institute on Oct. 17 wrote on Twitter, "I'm not reluctant to investigating labs - in fact, I believe I have even suggested doing that." Eddie Holmes, an evolutionary biologist and virologist and professor at the University of Sydney then replied, "Completely agree Kristian. I'm not against it either, although I think it detracts from the key point that emergence is about the human interaction with the animal world."

On Dec. 2, Trevor Bedford, an associate professor at the Fred Hutchinson Cancer Research Center Vaccine and Infectious Disease Division, posted Relman's article on Twitter and wrote, "Short answer is that I don't (and never did) consider lab accident hypothesis a 'conspiracy theory' and believe it should be addressed scientifically."

Trevor Bedford, Kristian Andersen & Eddie Holmes
- As I predicted back in Aprilhttps://t.co/KFdAyw4TvG
Now eagerly awaiting Daszak, Rambaut, & Mazzet with their retinue of minions to crawl out of woodwork singing a new jolly "but we always supported a lab investigation" tune https://t.co/iOfjRByIhJ pic.twitter.com/YugM0VJxTF

@Ayjchan @keverington 11. Excuse my language here, but the dead don't care for manners either, do they?
Danielle Anderson, Edward Holmes, Gerald Kesuch, Angela Rasmusssen, Dennis Carroll, Jim Le Duc (Galveston)
https://t.co/3oBpkruFak

> “I have worked in this exact laboratory at various times for the past 2 years,” wrote **Danielle Anderson**, scientific director of the Duke-NUS Medical School ABSL3 Laboratory, in a March 2 post on **Health Feedback**, a site where scientists review the veracity of news reports. “I can personally attest to the strict control and containment measures implemented while working there. The staff at WIV are incredibly competent, hardworking, and are excellent scientists with superb track records.”
>
> **Gerald Keusch**, a professor of medicine and international health and associate director of Boston University’s **National Emerging Infectious Diseases Laboratories**, also doubts the lab would have been prone to accidents.

> Watch these bastards eat their hats!
> 1. Statement from Prof. Holmes on the SARS-CoV-2 virus - 16 Aprilhttps://t.co/UyGlh1nyys
> 2. Why these scientists still doubt the coronavirus leaked from a Chinese labhttps://t.co/dhBy3lyP0H

@Ayjchan @keverington 14. From the Sunday Times article based on our work & findings but without credit as per the vulture UK press, noted by @Florian_Hanover
https://t.co/qL5YzYuOW0
Note 2 big name UK scientists trying to crawl out of the woodwork
Martin Hibberd,
Wendy Barclay
https://t.co/Kp6CCEXN4R

> This article follows the common line of thought of many of your tweets from the last weeks.
>
> Who are the authors? pic.twitter.com/1Afpl8ts4Q

— Florian (@Florian_Hanover) July 4, 2020

@Ayjchan @keverington @Florian_Hanover 15. So, good luck with your article, Alina, but make sure you respect and credit the originators like me by name when spoon feeding the journalists?
Thank you so much!

@Ayjchan @keverington @Florian_Hanover unroll for reference @threadreaderapp
