1) I have a COVID-19 hypothesis. I mean hypothesis in a very scientific way: An educated guess, that may or may not be true but needs investigation. It's a dark hypothesis and very controversial to be sure.

2) I came up with the hypothesis back in March, and I never saw it pushed anywhere until mid to late summer.

3) The Military World Games took place in Wuhan, China, in Oct 2019. Military services from all over the world took place in what was called the "military Olympics". Several U.S. service members took part. https://t.co/I0ixrDUdN3

4) Strikingly, Chinese government officials began taking draconian measures in Wuhan before news of SARS CoV-2 hit the media. 100 factories in a Wuhan district were ordered to cease production for half a month prior the start of the games, and on into the games.

5) The government even cut power to areas within the province, to force people to move out.

6) Here's something the U.S media tried very hard to suppress: Military members from various armies around the world began to get sick at the World Military Games, which kicked off in mid-Oct. https://t.co/qp94v9j3xc

7) It was of course after the games that CCP propagandist Zhao Lijian accused the U.S. military of bringing the virus to China. Notice that Twitter will not remove this outrageous accusation:
https://t.co/D9vHbMLxq2

> 2/2 CDC was caught on the spot. When did patient zero begin in US? How many people are infected? What are the names of the hospitals? It might be US army who brought the epidemic to Wuhan. Be transparent! Make public your data! US owe us an explanation! pic.twitter.com/vYNZRFPWo3

> — Lijian Zhao \u8d75\u7acb\u575a (@zlj517) March 12, 2020

8) Back in 2019, Dr. Fauci's National Institute of Allergy and Infectious Disease and NIH funded the Wuhan Institute of virology, to the tune of $7.4 million to conduct viral gain of function research. https://t.co/kFPcnAuufF

9) Note how quickly U.S. navy warships became infected with SARS CoV-2: By April, 26 of the Navy's 297 warships had crews that tested positive, all of them in port. https://t.co/x7Zchh8hCN

10) It was in August of 2019 that Trump announced that the U.S. would impose tariffs on China. It's difficult to overstate the effects this had on Chinese "face" and its economy. https://t.co/iwEoWyr23s

11) You see, China has plans, big plans. https://t.co/ujafi1l0Q8

12) What if China intentionally infected the U.S. military at Wuhan, back in Oct 2019 at the U.S. military games?

13) China is desperate to stop all attempts to find the origins of the virus, even utilizing trade wars tactics to make inquiries go away: https://t.co/WBmTPbVOie

14) A Chinese scientist claims the virus was made in a lab. The US media does its same old thing: Calls claims that cut against the grain, "baseless", instead of merely asking intelligent questions. https://t.co/lGNZINOX23

15) Other scientists have determined that the virus did not originate in nature. Some had papers published and then removed.

16) The FBI knew of the threat from China from viruses. Chinese scientists, in 2018, were caught bringing SARS and MERS samples into the US. Why would they do such a thing? https://t.co/4OmnMCxZyC

17) Hypothesis summary: China intentionally targeted U.S. military personnel with SAR CoV-2 at the World Military Games and possibly in areas around ports that the U.S. Navy uses in the pacific.
